LETTER FROM THE CHAIRMAN

Dear Shareholders,

I hope this letter finds you and your families well.

The global economy around the world continues to go through significant changes. Due to geopolitical uncertainties, inflationary pressures and tighter monetary policies, the Economic growth across the world over remains low as financial risks rise.

Against this back drop, India has registered a strong recovery post pandemic with growth averaging around 8% for the 3 year period ended FY2024. The domestic economy has continued strong momentum on the back of buoyant domestic demand. Having completed 75 years of independence, India is growing at a fast pace to take its place as one of the leading economies in the world. The nation is undergoing a social and economic transformation that is unmatched in history. It recently became the 5th largest economy in the world with sights now set on achieving the US\$5 trillion GDP mark. The Indian market stood out as robust infrastructure spending, resurgence in private sector investment and robust demand.

During the year under review, your company has settled the two contractual disputes under Vivad se Vishwas Scheme II launched by Government of India and executed one time settlement agreement for long pending claims against NHAI. These has improved the liquidity position of the group substantially.

Net Profit after Tax :- ₹48.96 Crores

Earning per Share :- ₹6.02

Outlook on Road Sector

India has the second-largest road network in the world, spanning a total of 6.7 million kilometres (kms). Private sector has emerged as a key player in the development of road infrastructure in India. Increased industrial activities, along with increasing number of two and four wheelers have supported the growth in road transport infrastructure projects. The Government's policy to increase private sector participation has proved to be a boon for the infrastructure industry with many private players entering the business through the public-private partnership (PPP) model. As of February 2024, there were 567 road PPP projects out of 1825 total projects in India.

India's road network has grown 59% to become the second-largest in the world in the last ten years. India has nearly 66.71 lakh km of total road network and the National Highways network alone stood at 146,145 km in CY 2023.

The Government of India has allocated ₹111 lakh crore (US\$ 1.4 trillion) under the National Infrastructure Pipeline for FY19-FY25. The roads sector is likely to account for 18% capital expenditure over FY19-FY25. Under the Union Budget 2024-25, the Government of India has allocated ₹2.78 lakh crore (US\$ 33.46 billion) to the Ministry of Road Transport and Highways. In March 2024, Prime Minister Narendra Modi inaugurated and laid the foundation stone for 112 national highway projects across various states, with a total worth of approximately US\$ 12.04 billion (₹1 lakh crore).

Many tenders have been floated recently by the Government for construction of new highways and expressway under EPC. However, due to aggressive bidding by the new entrants for Highway Projects, your company is patiently waiting for the right opportunity.

Outlook on Real Estate Sector

The growth of Real Estate sector is well complemented by the growth in the corporate environment and the demand for office space as well as urban and semi-urban accommodation. The construction industry ranks third among the 14 major sectors in terms of direct, indirect and induced effects in all sectors of the economy. In India, the real estate sector is the second-highest employment generator, after the agriculture sector.

Real estate sector in India is expected to reach US\$ 1 trillion in market size by 2030, up from US\$ 200 billion in 2021 and contribute 13% to the country's GDP by 2025. Retail, hospitality, and commercial real estate are also growing significantly, providing the much-needed infrastructure for India's growing needs.

India's real estate sector is expected to expand to US\$ 5.8 trillion by 2047, contributing 15.5% to the GDP from an existing share of 7.3%. India's physical retail landscape is poised for a substantial boost, with nearly 41 million sq. ft of retail developments set to be operational between 2024 and 2028 across the top 7 cities, encompassing projects in various stages from construction to planning. This market momentum is majorly driven by evolving consumer dynamics and a surge in projects with enhanced built-up experiences. The commercial segment has also grown steadily, fuelled by domestic demand, and increasing investor confidence in the Indian market. Favourable economic factors, such as a rising per capita income, stability in interest rates and strengthening regulations, are driving consumers today into the sector, particularly millennials who are opting for property ownership over renting. The largest demographic group, they prefer affordable, tech-savvy and socially conscious living spaces.

While the sector remains buoyant, further geopolitical escalations might cause an increase in commodity prices and cause a temporary slowdown. However, with interest rates expected to remain steady, the sector is anticipated to navigate any short-term headwinds successfully and head another year of growth.

Your company is about to start phase 2 of its prestigious real estate project near Kalyan in MMR region. Recently, the company has received Letter of Award for redevelopment of the plot and premises at Borivali, Mumbai. Your company is bidding for other good real estate project in Mumbai Metropolitan Region.

Yours Sincerely,

**Sd/-

MANAGEMENT DISCUSSION ANALYSIS

Infrastructure sector is a key driver for the Indian economy. The sector is highly responsible for propelling India's overall development and enjoys intense focus from Government for initiating policies that would ensure time-bound creation of world class infrastructure in the country. Infrastructure sector includes power, bridges, dams, roads, and urban infrastructure development.

Market Size

In Interim Budget 2024-25, capital investment outlay for infrastructure has been increased by Rs. 11.11 lakh crore (US\$ 133.86 billion), which would be 3.4 % of GDP. As per the Interim Budget 2023-24, a capital outlay of Rs. 2.55 lakh crore (US\$ 30.72 billion) has been made for the Railways, an increase of 5.8% over the previous year.

Starting with 6,835 projects, the NIP project count now stands at 9,142 covering 34 sub-sectors, as per news reports. Under the initiative, 2476 projects are under the development phase with an estimated investment of US\$ 1.9 trillion. Nearly half of the under-development projects are in the transportation sector, and 3,906 are in the roads and bridges sub-sector.

India's logistics market is estimated to be US\$ 317.26 billion in 2024 and is expected to reach US\$ 484.43 billion by 2029, growing at a CAGR of 8.8%.

India intends to raise its ranking in the Logistics Performance Index to 25 and bring down the logistics cost from 14% to 8% of GDP, leading to a reduction of approximately 40%, within the next five years. At almost 20 kms, Mumbai monorail is the third largest route in the world after China with 98 kms and Japan with 28 kms.

Indian logistics market is estimated to touch US\$ 320 billion by 2025. The overall infrastructure capex is estimated to grow at a CAGR of 11.4% over 2021-26 driven by spending on water supply, transport, and urban infrastructure. Investment in infrastructure contributed around 5% of the GDP in the tenth five-year plan as against 9% in the eleventh five-year plan. Further, US\$ 1 trillion investment in infrastructure was proposed by the India's planning commission during the 12th five-year plan, with 40% of the funds coming from the private sector.

Government Initiative and investment

• Capital expenditure (capex) allocation

The Central government has increased its capital expenditure (capex) allocation to US\$ 133.9 billion (Rs. 11.11 trillion) for the fiscal year beginning April 1, 2024, with a focus on advancing India's infrastructure, as part of a strategic move to stimulate economic growth. An increase of 11.1% from the previous year, the FY25 interim budget allots US\$ 133.9 billion (Rs. 11.11 trillion) for capital expenditures, or 3.4% of GDP.

- Three significant economic railway corridor initiatives-energy, port connectivity, mineral and cement, and high traffic density-will be carried out by the railway industry. Additionally, in order to improve passenger safety, convenience, and comfort, forty thousand standard rail bogies will be converted to Vande Bharat standards.
- In the aviation sector, the number of airports has doubled to 149, and currently, 1.3 crore passengers are transported on 517 new routes. Indian airlines have taken the initiative to order more than a thousand new aircraft.
- The Indian government has introduced various formats to attract private investments, especially in roads and highways, airports, industrial parks and higher education and skill development sectors. Private Equity-Venture Capital firms invested US\$ 3.5 billion (across 71 deals) in Indian companies in May 2023.
- The government is working towards the development of a national highway network of 2 lakh kilometres by 2025.
- Gatishakti National Master Plan (NMP)

The government launched the PM Gatishakti National Master Plan (NMP) with a focus on major transport sectors to enhance multimodal connectivity infrastructure in various economic zones. It aims to bring together the infrastructure schemes such as Bharatmala, Sagarmala, UDAN etc. under a digital platform. The NMP offers a detailed database of trunk and utility infrastructure, ongoing and future projects from different ministries/departments of both the Central Government and States/UTs. Integrated with the GIS-enabled PM Gatishakti platform, this allows for streamlined planning, design, and monitoring of next-generation infrastructure projects on a single portal. As per the India Investment Grid (IIG) database, there are currently 15,580 projects worth \$2388.93 Bn at various stages of development.

• Bharatmala Pariyojana Projects

The Bharatmala Pariyojana is progressing with Phase I focusing on developing 34,800 km of National Highways. It emphasizes corridor-based development and is set to conclude by 2027-2028, covering 31 States/UTs and over 550 districts. Additionally, the government targets building 22 new greenfield expressways, signalling significant advancements in India's transportation infrastructure.

• UDAN

The Ministry of Civil Aviation's flagship Regional Connectivity Scheme UDAN (Ude Desh Ka Aam Nagarik) aims to enhance air connectivity to regional airports in small towns. Launched in 2016, UDAN focuses on making flight services accessible to common citizens by developing infrastructure and air connectivity. In its first 5 years, UDAN served over one crore passengers, inaugurating 425 new routes and 58 airports. The Budget for 2023-24 allocated INR 1,244.07 Cr to UDAN, doubling the previous year's budget, with plans to revive 22 airports. Additionally, the government outlined the revival of 50 additional airports, heliports, water aerodromes, and advanced landing grounds.

• Ports

Indian Ports "Turn Around Time" has reached 0.9 days which is better than USA (1.5 days), Australia (1.7 days) and Singapore (1.0 days), as per the World Bank's Logistics Performance Index (LPI) Report 2023. Sagarmala, the flagship Central Sector Scheme of the Ministry of Ports, Shipping and Waterways, promotes port-led development in the country through harnessing India's 7,500 km long coastline, 14,500 km of potentially navigable waterways and strategic location on key international maritime trade routes. The Union Minister for Ports, Shipping and Waterways said that the country's total port capacity will increase from the existing 2,600 MTPA (Mn Tonnes per annum) to more than 10,000 MTPA in 2047. From April to November 2023, cargo of 86.47 MMT moved through Waterways as compared to 80.44 MMT during April to November 2022, i.e. an increase of 7.49%. The government also aims to operationalise 23 waterways by 2030.

• Railways

India's railway sector is undertaking ambitious projects such as the Mumbai-Ahmedabad Speed Rail Corridor, the world's highest pier bridge under construction, and the Chenab bridge in Jammu & Kashmir - the world's highest railway bridge. With a total Broad Gauge network of 61,508 km electrified as of December 2023, the sector has also introduced 35 indigenously designed Vande Bharat Express trains, with six more set to launch soon. These trains serve up to 247 districts across the country. Indian Railways aims to become a Net Zero Carbon Emitter by 2030, with 211 MW of solar plants and 103 MW of wind power plants commissioned as of October 2023, along with 2150 MW of renewable capacity tied up.

• National Infrastructure Pipeline (NIP)

Private sector participation is vital for financing key infrastructure projects in India, given the government's fiscal constraints and the need for prudent spending. India launched the National Infrastructure Pipeline (NIP), in 2020 which envisages an investment of INR 111 Lakh Cr over 2020 to 2025 i.e., an annual average investment of almost INR 22 Lakh Cr. Public Private Partnerships (PPP) have been identified as a valuable instrument to speed up infrastructure development and investments envisaged under NIP. Involving the private sector promotes industry competitiveness, enabling access to a wider talent pool and enhanced resource utilization. There are several PPP projects currently in pipeline across sectors such as the development of Pune metro line 3, Hyderabad and Bengaluru metro extensions, development of multi modal logistics park in Chennai, and more.

• Smart Cities Mission

It is essential for India to prioritize the development of both urban and rural areas to ensure overall national progress. By 2030, it is projected that 40% of India's population will reside in urban areas, contributing significantly to the country's GDP. However, rapid urbanization poses challenges in managing infrastructure and delivering services effectively. The Smart Cities Mission is a key initiative aimed at addressing these challenges efficiently. As of February 2024, 6,753 projects out of a total of 7,991 have been completed under the Smart Cities Mission, showcasing tangible progress. Moreover, India has made significant strides in digital infrastructure development, with rural areas expected to contribute significantly to new internet user growth, with around 56% of total new internet users coming from rural India by 2025, according to a report by TransUnion CIBIL. This trend underscores the increasing connectivity between rural and urban regions in the country

Benefits Of Government Infrastructure Projects

The development of infrastructure provides numerous economic, social and environmental benefits. On the economic front, it helps to increase GDP growth by stimulating private investments in sectors such as manufacturing, services and transport. It also helps to create job opportunities by providing employment opportunities for skilled labour. Furthermore, it improves trade and investment opportunities by improving connectivity between different parts of the country.

On the social front, it helps to improve healthcare facilities by providing better access to hospitals and health centres. It also helps to improve education facilities by providing better access to educational institutions across the country.

On the environmental front, it helps to reduce pollution levels by providing better public transport systems such as metro rails and buses. It also helps to improve water quality by providing better sewage treatment systems and better water supply systems.

Road Ahead

Roads and highways sector is considered to be the most vibrant infrastructure segment where a lot of activities ongoing consistently for a long time. While other construction segments see ups and downs, the development of roads and highways has been happening in the country in a sustainable manner.

REAL ESTATE

Introduction

Real estate sector is one of the most globally recognized sectors. It comprises of four sub sectors - housing, retail, hospitality, and commercial. The growth of this sector is well complemented by the growth in the corporate environment and the demand for office space as well as urban and semi-urban accommodations. The construction industry ranks third among the 14 major sectors in terms of direct, indirect and induced effects in all sectors of the economy.

In India, the real estate sector is the second-highest employment generator, after the agriculture sector. It is also expected that this sector will incur more non-resident Indian (NRI) investment, both in the short term and the long term.

Market Size

Real estate sector in India is expected to reach a market size of US\$ 1 trillion by 2030 from US\$ 200 billion in 2021 and contribute 13% to the country's GDP by 2025. Retail, hospitality, and commercial real estate are also growing significantly, providing the much-needed infrastructure for India's growing needs. India's real estate sector is expected to expand to US\$ 5.8 trillion by 2047, contributing 15.5% to the GDP from an existing share of 7.3%. According to Savills India, real estate demand for data centres is expected to increase by 15-18 million sq. ft. by 2025.

According to the Economic Times Housing Finance Summit, about three houses are built per 1,000 people per year compared with the required construction rate of five houses per 1,000 population. The current shortage of housing in urban areas is estimated to be ~10 million units. An additional 25 million units of affordable housing are required by 2030 to meet the growth in the country's urban population.

Growth drivers :

Increasing population

India, with a population of 144,18,38,920 has recently surpassed China. With a median age of 28.2 years, India's growing population underscores the critical need to prioritize infrastructure and real estate development. Improving connectivity through enhanced infrastructure is vital to ensure efficient and seamless transportation for its citizens.

Urbanisation

The government announced ₹77,523.58 crore (US\$ 9.3 billion) to the Ministry of Housing and Urban Affairs

Industrialization

The launch of the PLI scheme will fuel industrial growth, leading to an increased demand for faster transit times and improved road infrastructure. This highlights the need for enhanced road connectivity throughout the country.

Infrastructure investment

To achieve India's goal of becoming a \$5 trillion economy by 2027, infrastructure development is crucial. The infrastructure sector has become the biggest focus area for the Government of India. India's GDP is expected to grow by 8% over the next three fiscal years. The budget places a strong emphasis on the development of roads, shipping, and railways. Global investment and partnerships in infrastructure, such as the India-Japan forum for development in the Northeast are also indicative of more investments.

Under Interim Budget 2024-25, capital investment outlay for infrastructure has been increased by 11.1% to Rs.11.11 lakh crore (US\$ 133.86 billion), which would be 3.4 % of GDP . Two Hundred & Twenty Two destinations (airports/heliports/water aerodromes) under UDAN are targeted to be completed by 2026 with 1000 routes to provide air connectivity to unconnected destinations in India.

Key Risks

While the management is very optimistic about the Company's growth outlook, it is subject to certain risks and uncertainties. A spate of policy reforms by the statutory bodies has made the Indian infrastructure space more attractive for the new players to enter and therefore possible rise in competition in the sector. Atlantaa Limited has around four decades of experience in the industry and has positioned itself in niche space following a conservative approach. Infrastructure being a capital-intensive sector requires high level of long-term debt financing. Moreover, increasing interest rates during the span of project can challenge the profit margins. Infrastructure projects involve complex design and engineering, substantial procurement of machinery and equipment, extensive construction management and sophisticated activities executed over an extended period of time. Moreover, availability of input material and volatility in its cost, arrangement of manpower could be other risks the Company is exposed to. The Company maintains a healthy and long-term relationship with its suppliers and workforce to ensure seamless execution of its projects. It also maintains strong execution efficiencies by effectively mobilizing its machineries and other resources. India is positioned for a sustainable and long-term growth.

Risk management

The Company has implemented a robust risk management framework to identify and mitigate operational and business risks. The senior management and risk management committee regularly review major risk areas. Comprehensive policies and procedures are in place to identify, mitigate and monitor risks at various levels. The company conducts a comprehensive risk review through an external agency, which provides recommendations to the Board on risk management strategies and possible controls.

Internal control systems and their adequacy

The company has an adequate internal control system in place, which is regularly monitored and updated to safeguard assets, comply with regulations and promptly address any issues. All significant transactions are authorized, recorded and reported correctly. The audit committee diligently reviews internal audit reports, takes corrective action as required and maintains open communication with both statutory and internal auditors to ensure the effectiveness of internal control systems.

Cautionary Statement

Statements in the Management Discussion and Analysis describing Atlantaa Limited's objectives, projections, estimates, expectations may be "forward-looking statements". Actual results may differ materially from those expressed or implied. Important factors that could make difference to the Atlantaa Limited's operations include economic conditions in which Atlantaa Limited operates, change in government regulations, tax laws, statutes and other factors such as litigations and industrial relations.

CORPORATE GOVERNANCE REPORT

INDEPENDENT AUDITOR'S REPORT TO THE MEMBERS OF ATLANTAA LIMITED

Report on the Audit of the Standalone Financial Statements

Opinion

We have audited the accompanying standalone financial statements of Atlantaa Limited ("the Company"), which comprises the Balance Sheet as at March 31, 2024, the Statement of Profit and Loss (including Other Comprehensive Income), the Statement of Changes in Equity and the Statement of Cash Flows for the year ended on that date and a summary of the significant accounting policies and other explanatory information (hereinafter referred to as "the standalone financial statements").

In our opinion and to the best of our information and according to the explanations given to us, the aforesaid standalone financial statements give the information required by the Companies Act, 2013 ("the Act") in the manner so required and give a true and fair view in conformity with the Indian Accounting Standards prescribed under section 133 of the Act read with the Companies (Indian Accounting Standards) Rules, 2015, as amended, ("Ind AS") and other accounting principles generally accepted in India, of the state of affairs of the Company as at March 31, 2024, the profit and total comprehensive income, changes in equity and its cash flows for the year ended on that date.

Basis for Opinion

We conducted our audit of the standalone financial statements in accordance with the Standards on Auditing specified under section 143(10) of the Act (SAs). Our responsibilities under those Standards are further described in the Auditor's Responsibilities for the Audit of the Standalone Financial Statements section of our report. We are independent of the Company in accordance with the Code of Ethics issued by the Institute of Chartered Accountants of India (ICAI) together with the independence requirements that are relevant to our audit of the standalone financial statements under the provisions of the Act and the Rules made thereunder and we have fulfilled our other ethical responsibilities in accordance with these requirements and the ICAI's Code of Ethics. We believe that the audit evidence we have obtained is sufficient and appropriate to provide a basis for our audit opinion on the standalone financial statements.

Key Audit Matters

Key audit matters are those matters that, in our professional judgment, were of most significance in our audit of the standalone financial statements of the current period. These matters were addressed in the context of our audit of the standalone financial statements as a whole and in forming our opinion thereon, and we do not provide a separate opinion on these matters. We have not determined any matters described to be the key audit matters to be communicated in our report.

Information Other than the Financial Statements and Auditor's Report Thereon

The Company's Board of Directors is responsible for the preparation of the other information. The other information comprises the information included in the Management Discussion and Analysis, Board's Report including Annexures to Board's Report, Business Responsibility Report, Corporate Governance and Shareholder's Information, but does not include the standalone financial statements and our auditor's report thereon.

Our opinion on the standalone financial statements does not cover the other information and we do not express any form of assurance conclusion thereon.

In connection with our audit of the standalone financial statements, our responsibility is to read the other information and, in doing so, consider whether the other information is materially inconsistent with the standalone financial statements or our knowledge obtained during the course of our audit or otherwise appears to be materially misstated.

If, based on the work we have performed, we conclude that there is a material misstatement of this other information; we are required to report that fact. We have nothing to report in this regard.

Management's Responsibility for the Standalone Financial Statements

The Company's Board of Directors is responsible for the matters stated in section 134(5) of the Act with respect to the preparation of these standalone financial statements that give a true and fair view of the financial position, financial performance, total comprehensive income, changes in equity and cash flows of the Company in accordance with the Ind AS and other accounting principles generally accepted in India.

This responsibility also includes maintenance of adequate accounting records in accordance with the provisions of the Act for safeguarding the assets of the Company and for preventing and detecting frauds and other irregularities; selection and application of appropriate accounting policies; making judgments and estimates that are reasonable and prudent; and design, implementation and maintenance of adequate internal financial controls, that were operating effectively for ensuring the accuracy and completeness of the accounting records, relevant to the preparation and presentation of the standalone financial statements that give a true and fair view and are free from material misstatement, whether due to fraud or error.

In preparing the standalone financial statements, management is responsible for assessing the Company's ability to continue as a going concern, disclosing, as applicable, matters related to going concern and using the going concern basis of accounting unless management either intends to liquidate the Company or to cease operations, or has no realistic alternative but to do so. The Board of Directors are responsible for overseeing the Company's financial reporting process.

Auditor's Responsibilities for the Audit of the Standalone Financial Statements

Our objectives are to obtain reasonable assurance about whether the standalone financial statements as a whole are free from material misstatement, whether due to fraud or error, and to issue an auditor's report that includes our opinion. Reasonable assurance is a high level of assurance, but is not a guarantee that an audit conducted in accordance with SAs will always detect a material misstatement when it exists. Misstatements can arise from fraud or error and are considered material if, individually or in the aggregate, they could reasonably be expected to influence the economic decisions of users taken on the basis of these standalone financial statements.

As part of an audit in accordance with SAs, we exercise professional judgment and maintain professional scepticism throughout the audit. We also:

- Identify and assess the risks of material misstatement of the standalone financial statements, whether due to fraud or error, design and perform audit procedures responsive to those risks, and obtain audit evidence that is sufficient and appropriate to provide a basis for our opinion. The risk of not detecting a material misstatement resulting from fraud is higher than for one resulting from error, as fraud may involve collusion, forgery, intentional omissions, misrepresentations, or the override of internal control.
- Obtain an understanding of internal financial controls relevant to the audit in order to design audit procedures that are appropriate in the circumstances. Under section 143(3)(I) of the Act, we are also responsible for expressing our opinion on whether the Company has adequate internal financial controls system in place and the operating effectiveness of such controls.

- Evaluate the appropriateness of accounting policies used and the reasonableness of accounting estimates and related disclosures made by management.
- Conclude on the appropriateness of management’s use of the going concern basis of accounting and, based on the audit evidence obtained, whether a material uncertainty exists related to events or conditions that may cast significant doubt on the Company’s ability to continue as a going concern. If we conclude that a material uncertainty exists, we are required to draw attention in our auditor’s report to the related disclosures in the standalone financial statements or, if such disclosures are inadequate, to modify our opinion. Our conclusions are based on the audit evidence obtained up to the date of our auditor’s report. However, future events or conditions may cause the Company to cease to continue as a going concern.
- Evaluate the overall presentation, structure and content of the standalone financial statements, including the disclosures, and whether the standalone financial statements represent the underlying transactions and events in a manner that achieves fair presentation.

Materiality is the magnitude of misstatements in the standalone financial statements that, individually or in aggregate, makes it probable that the economic decisions of a reasonably knowledgeable user of the financial statements may be influenced. We consider quantitative materiality and qualitative factors in (i) planning the scope of our audit work and in evaluating the results of our work; and (ii) to evaluate the effect of any identified misstatements in the financial statements.

We communicate with those charged with governance regarding, among other matters, the planned scope and timing of the audit and significant audit findings, including any significant deficiencies in internal control that we identify during our audit.

We also provide those charged with governance with a statement that we have complied with relevant ethical requirements regarding independence, and to communicate with them all relationships and other matters that may reasonably be thought to bear on our independence, and where applicable, related safeguards.

From the matters communicated with those charged with governance, we determine those matters that were of most significance in the audit of the standalone financial statements of the current period and are therefore the key audit matters. We describe these matters in our auditor’s report unless law or regulation precludes public disclosure about the matter or when, in extremely rare circumstances, we determine that a matter should not be communicated in our report because the adverse consequences of doing so would reasonably be expected to outweigh the public interest benefits of such communication.

Report on Other Legal and Regulatory Requirements

As required by the **Companies (Auditor’s Report) Order, 2020 (“the Order”)** issued by the Central Government of India in terms of sub-section (11) of section 143 of the Act, we give in the **“Annexure-A”**, a statement on the matters specified in the paragraph 3 and 4 of the Order, to the extent applicable.

1. As required by Section 143(3) of the Act, based on our audit we report that:

- a) We have sought and obtained all the information and explanations which to the best of our knowledge and belief were necessary for the purposes of our audit.
- b) In our opinion, proper books of account as required by law have been kept by the Company so far as it appears from our examination of those books.

- c) The Balance Sheet, the Statement of Profit and Loss including Other Comprehensive Income, Statement of Changes in Equity and the Statement of Cash Flow dealt with by this Report are in agreement with the relevant books of account.
- d) In our opinion, the aforesaid standalone financial statements comply with the Ind AS specified under Section 133 of the Act, read with Rule 7 of the Companies (Accounts) Rules, 2014.

ANNEXURE “B” TO THE INDEPENDENT AUDITOR’S REPORT

(Referred to in paragraph 1(f) under ‘Report on Other Legal and Regulatory Requirements’ section of our report to the Members of Atlanta Limited of even date)

Report on the Internal Financial Controls Over Financial Reporting under Clause (i) of Sub-section 3 of Section 143 of the Companies Act, 2013 (“the Act”)

We have audited the internal financial controls over financial reporting of ATLANTAA LIMITED (“the Company”) as of March 31, 2024 in conjunction with our audit of the standalone financial statements of the Company for the year ended on that date.

Management’s Responsibility for Internal Financial Controls

The Board of Directors of the Company is responsible for establishing and maintaining internal financial controls based on the internal control over financial reporting criteria established by the Company considering the essential components of internal control stated in the Guidance Note on Audit of Internal Financial Controls Over Financial Reporting issued by the Institute of Chartered Accountants of India. These responsibilities include the design, implementation and maintenance of adequate internal financial controls that were operating effectively for ensuring the orderly and efficient conduct of its business, including adherence to respective company’s policies, the safeguarding of its assets, the prevention and detection of frauds and errors, the accuracy and completeness of the accounting records, and the timely preparation of reliable financial information, as required under the Companies Act, 2013.

Auditor’s Responsibility

Our responsibility is to express an opinion on the internal financial controls over financial reporting of the Company based on our audit. We conducted our audit in accordance with the Guidance Note on Audit of Internal Financial Controls Over Financial Reporting (the “Guidance Note”) issued by the Institute of Chartered Accountants of India and the Standards on Auditing prescribed under Section 143(10) of the Companies Act, 2013, to the extent applicable to an audit of internal financial controls. Those Standards and the Guidance Note require that we comply with ethical requirements and plan and perform the audit to obtain reasonable assurance about whether adequate internal financial controls over financial reporting was established and maintained and if such controls operated effectively in all material respects.

Our audit involves performing procedures to obtain audit evidence about the adequacy of the internal financial controls system over financial reporting and their operating effectiveness. Our audit of internal financial controls over financial reporting included obtaining an understanding of internal financial controls over financial reporting, assessing the risk that a material weakness exists, and testing and evaluating the design and operating effectiveness of internal control based on the assessed risk. The procedures selected depend on the auditor’s judgement, including the assessment of the risks of material misstatement of the financial statements, whether due to fraud or error.

We believe that the audit evidence we have obtained, is sufficient and appropriate to provide a basis for our audit opinion on the internal financial controls system over financial reporting of the Company.

Meaning of Internal Financial Controls Over Financial Reporting

A company’s internal financial control over financial reporting is a process designed to provide reasonable assurance regarding the reliability of financial reporting and the preparation of financial statements for external purposes in accordance with generally accepted accounting principles. A company’s internal financial control over financial reporting includes those policies and procedures that (1) pertain to the maintenance of records that, in reasonable detail, accurately and fairly reflect the transactions and dispositions of the assets of the company; (2) provide reasonable assurance that transactions are recorded as necessary to permit preparation of financial statements in accordance with generally accepted accounting principles, and that receipts and expenditures of the company are being made only in accordance with authorisations of management and directors of the company; and (3) provide reasonable assurance regarding prevention or timely detection of unauthorised acquisition, use, or disposition of the company’s assets that could have a material effect on the financial statements.

Inherent Limitations of Internal Financial Controls Over Financial Reporting

Because of the inherent limitations of internal financial controls over financial reporting, including the possibility of collusion or improper management override of controls, material misstatements due to error or fraud may occur and not be detected. Also, projections of any evaluation of the internal financial controls over financial reporting to future periods are subject to the risk that the internal financial control over financial reporting may become inadequate because of changes in conditions, or that the degree of compliance with the policies or procedures may deteriorate.

Opinion

In our opinion, to the best of our information and according to the explanations given to us, the Company has, in all material respects, an adequate internal financial controls system over financial reporting and such internal financial controls over financial reporting were operating effectively as at March 31, 2024, based on the internal control over financial reporting criteria established by the Company considering the essential components of internal control stated in the Guidance Note on Audit of Internal Financial Controls Over Financial Reporting issued by the Institute of Chartered Accountants of India.

The Company is a public limited company which is listed on two recognized stock exchanges in India and is incorporated and domiciled in India under the provisions of the Companies Act. The registered office of the Company is located at 501, Supreme Chambers, Veera Desai Road, Andheri (West), Mumbai - 400 053.

The Company is registered as Medium enterprises under Ministry of Micro, Small and Medium Enterprises vide registration No.MH190011868.

These financial statements were authorized for issue by the Board of Directors on May 25, 2024.

2 Summary of significant accounting policies

2.1 Basis of preparation

The Standalone financial statements have been prepared in accordance with the Indian Accounting Standards (hereinafter referred to as the 'Ind AS') as notified by Ministry of Corporate Affairs pursuant to Section 133 of the Companies Act, 2013 ('the Act') read with the Companies (Indian Accounting standards) Rules, 2015 and other relevant provisions of the Act.

The principal accounting policies applied in the preparation of these financial statements are set out below. These policies have been consistently applied to all the years presented, unless otherwise stated.

i Historical cost convention

The financial statements have been prepared under the historical cost convention, as modified by the following:

- a. Certain financial assets and financial liabilities at fair value;
- b. Defined benefit plans – plan assets that are measured at fair value;

ii) Fair value measurement

Fair value is the price that would be received to sell an asset or paid to transfer a liability in an orderly transaction between market participants on the measurement date. The Company uses valuation techniques that are appropriate in the circumstances for which sufficient data are available to measure fair value, maximizing the use of relevant observable inputs and minimizing the use of unobservable inputs.

All assets and liabilities for which fair value is measured or disclosed in the financial statements are categorized within the fair value hierarchy, described as follows, based on the lowest level input that is significant to the fair value measurement as a whole:

- > Level 1 - Quoted (unadjusted) market prices in active markets for identical assets or liabilities
- > Level 2 - Valuation techniques for which the lowest level input that is significant to the fair value measurement is directly or indirectly observable
- > Level 3 - Valuation techniques for which the lowest level input that is significant to the fair value measurement is unobservable

iii) Current vis-a-vis non-current classification

The assets and liabilities reported in the balance sheet are classified on a "current/non-current basis", with separate reporting of assets held for sale and liabilities. Current assets, which include cash and cash equivalents, are assets that are intended to be realized, sold or consumed during the normal operating cycle of the Company or in the 12 months following the balance sheet date; current liabilities are liabilities that are expected to be settled during the normal operating cycle of the Company or within the 12 months following the close of the financial year. The deferred tax assets and liabilities are classified as non-current assets and liabilities.

2.2 Property, plant and equipment:

Freehold land is carried at historical cost. All other items of property, plant and equipment are stated at historical cost less depreciation and impairment loss, if any. Historical cost includes expenditure that is directly attributable to the acquisition of the items.

Subsequent costs are included in the asset's carrying amount or recognized as a separate asset, as appropriate, only when it is probable that future economic benefits associated with the item will flow to the Company and the cost of the item can be measured reliably. The carrying amount of any component accounted for as a separate asset is derecognized when replaced. All other repairs and maintenance are charged to profit or loss during the reporting period in which they are incurred.

Depreciation methods, estimated useful lives and residual value:

Depreciation is calculated using the straight line method to allocate their cost, net of their residual values, over their estimated useful lives which are as follows:

<i>Particulars</i>	<i>Estimated useful lives(Years)</i>
Buildings	60
Plant and equipment's and earthmoving machinery	12
Furniture and fixtures	10
Vehicles	9
Office and equipment's	5
Temporary structures	3

Estimated useful lives, residual values and depreciation methods are reviewed annually and adjusted if appropriate, at the end of each reporting period.

(₹ in Lakhs)

2.3 Capital work in progress

Expenditure incurred on assets which are not ready for their intended use comprising direct cost, related incidental expenses and attributable borrowing cost are disclosed under Capital Work-in-Progress.

2.4 Intangible assets:

Intangible assets are stated at cost of acquisition net of recoverable taxes less accumulated amortization / depletion and impairment loss, if any. The cost comprises of purchase price, cost of construction, borrowing costs and any cost directly attributable to bringing the asset to its working condition for the intended use.

2.5 Amortization method and periods

Amortization is charged on a straight-line basis over the estimated useful lives. The estimated useful lives, residual value and amortization method are reviewed at the end of each annual reporting period, with the effect of any changes in the estimate being accounted for on a prospective basis.

Amortization of intangible assets (toll roads) created under BOT projects; the revenue based methodology is adopted

Computer software is amortized over an estimated useful life of 3 years.

2.6 Lease

Ind AS 116 requires lessees to determine the lease term as the non-cancellable period of a lease adjusted with any option to extend or terminate the lease, if the use of such option is reasonably certain. The company make an assessment on the expected lease term on lease-by-lease basis and thereby assess whether it is reasonably certain that any options to extend or terminate the contract will be exercised in. In evaluating the lease term, the company consider factors such as any significant leasehold improvement undertaken over the lease term, cost relating to termination of recognized in the statement of profit and loss when incurred . The cost and related accumulated depreciation are eliminated from the financial statement upon sale or retirement of the asset and the resultant gains or losses are recognized in the Statement of Profit and Loss.

Accounting policy

The company as lessee

The Company's lease asset classes primarily consist of leases for buildings. The Company assesses whether a contract contains a lease at the inception of a contract. A contract is, or contains, a lease if the contract conveys the right to control the use of an identified asset for a period of time in exchange for consideration. To assess whether a contract conveys the right to control the use of an identified asset, the Company assesses whether: (i) the contract involves the use of an identified asset (ii) the Company has substantially all of the economic benefits from use of the asset through the period of the lease and (iii) the Company has the right to direct the use of the asset.

At the date of commencement of the lease, the Company recognizes a right-of-use (ROU) asset and a corresponding lease liability for all lease arrangements in which it is a lessee, except for leases with a term of 12 months or less (short-term leases) and low-value leases. For these short-term and low-value leases, the Company recognizes the lease payments as an operating expense on a straight-line basis over the term of the lease.

Certain lease arrangements include the options to extend or terminate the lease before the end of the lease term. ROU assets and lease liabilities include these options when it is reasonably certain that they will be exercised.

ROU assets are initially recognized at cost, which comprises the initial amount of the lease liability adjusted for any lease payments made at or prior to the commencement date of the lease plus any initial direct costs less any lease incentives. They are subsequently measured at cost less accumulated depreciation and impairment losses.

ROU assets are depreciated from the commencement date on a straight-line basis over the shorter of the lease term and useful life of the underlying asset. ROU assets are evaluated for recoverability whenever events or changes in circumstances indicate that their carrying amounts may not be recoverable. For the purpose of impairment testing, the recoverable amount (i.e. the higher of the fair value less cost to sell and the value-in-use) is determined on an individual asset basis unless the asset does not generate cash flows that are largely independent of those from other assets. In such cases, the recoverable amount is determined for the Cash Generating Unit (CGU) to which the asset belongs.

The lease liability is initially measured at amortized cost at the present value of the future lease payments. The lease payments are discounted using the interest rate implicit in the lease or, if not readily determinable, using the incremental borrowing rates in the country of domicile of these leases. Lease liabilities are remeasured with a corresponding adjustment to the related ROU asset if the Company changes its assessment of whether it will exercise an extension or a termination option.

Lease liability and ROU asset have been separately presented in the Balance Sheet and lease payments have been classified as financing cash flows.

The company as lessor

Leases for which the Company is a lessor is classified as a finance or operating lease. Whenever the terms of the lease transfer substantially all the risks and rewards of ownership to the lessee, the contract is classified as a finance lease. All other leases are classified as operating leases.

When the Company is an intermediate lessor, it accounts for its interests in the head lease and the sublease separately. The sublease is classified as a finance or operating lease by reference to the right-of-use asset arising from the head lease.

For operating leases, rental income is recognized on a straight-line basis over the term of the relevant lease.

Atlanta Limited (formerly known as Atlanta Limited)
Corporate General information and Summary of significant accounting policies for the year ended March 31, 2024

2.7 Investment properties:

(₹ in Lakhs)

Property that is held for long term rental yields or for capital appreciation or both, and that is not occupied by the Company is classified as investment property. Investment property is measured initially at cost, including related transaction costs and where applicable borrowing costs. Subsequent expenditure is capitalized to the asset's carrying amount only when it is probable that the future economic benefits associated with the expenditure will flow to the Company and the cost of the item can be measured reliably. All other repairs and maintenance costs are expensed when incurred. When part of an investment property is replaced, the carrying amount of the replaced part is derecognized.

Investment properties are depreciated using the straight line method over their estimated useful lives. Investment properties which are buildings generally have a useful life of 60 years.

2.8 Impairment of non-financial assets:

Assets which are subject to depreciation or amortization are tested for impairment whenever events or changes in circumstances indicate that the carrying amount may not be recoverable. An impairment loss is recognized for the amount by which the asset's carrying amount exceeds its recoverable amount. The recoverable amount is the higher of an asset's fair value less costs of disposal and value in use. For the purposes of assessing impairment, assets are grouped at the lowest levels for which there are separately identifiable cash inflows which are largely independent of the cash inflows from other assets or groups of assets (cash-generating units). Non-financial assets that suffered an impairment are reviewed for possible reversal of the impairment at the end of each reporting period.

2.9 Investments in subsidiaries, Joint ventures and Associates

Investments in subsidiaries, Joint ventures and associates are measured at cost less provision for impairment, if any.

2.10 Trade Receivable:

Trade receivables which do not contain significant financing component is measured at its transaction price (as defined in Ind AS 115 Revenue on Contract with Customers). The company uses simplified approach to measuring impairment at an amount equal to life time expected credit losses method.

2.11 Cash and cash equivalents

Cash and cash equivalent in the balance sheet comprises cash at banks and on hand and Short-term deposits with an original maturity of three months or less, which are subject to an insignificant risk of change in value. For the purpose of financial statement of cash flow, cash and cash equivalent consists of cash and Short-term deposits, as defined above, net of outstanding bank overdrafts as they are considered an integral part of the Company's cash management.

2.12 Inventories

Inventories are valued as follows:

Construction materials, components, stores, spares and tools:

Lower of cost and net realizable value and includes all applicable costs in bringing goods to their present location and condition.

Work-in-progress and finished goods

Lower of cost and net realizable value. Cost includes cost of direct materials and labour and a proportion of manufacturing overheads based on the normal operating capacity, but excluding borrowing costs. Cost is determined on weighted average basis.

Net realizable value is the estimated contract price in the ordinary course of business, less estimated costs of completion and estimated costs necessary to complete the contract.

Land:

Land of real estate business are valued at lower of cost and net realizable value.

Cost includes land, cost of acquisition, legal cost and all other cost to transfer the legal and beneficial ownership of land in the name of the Group.

Net realizable value is the estimated selling price in the ordinary course of business, less estimated costs of completion and the estimated costs necessary to make the sale.

2.13 Financial instruments:

A financial instrument is any contract that gives rise to a financial asset of one entity and a financial liability or equity instruments of another entity.

2.14 Investments and other financial assets

i. Classification

The Company classifies its financial assets in the following measurement categories:

those to be measured subsequently at fair value (either through Other Comprehensive Income or through profit or loss) and those measured at amortized cost.

The classification depends on the entity's business model for managing the financial assets and the contractual terms of the cash flows.

For assets measured at fair value, gains and losses will either be recorded in profit or loss or Other Comprehensive Income. For investments in debt instruments, this will depend on the business model in which the investment is held. For investments in equity instruments in subsidiaries, the Company has made an irrevocable election at the time of initial recognition to account for the equity investment at fair value through Other Comprehensive Income.

The Company reclassifies debt investments when and only when its business model for managing those assets changes.

(₹ in Lakhs)

ii. Measurement

At initial recognition, the Company measures financial assets at its fair value plus, in the case of financial assets not at fair value through profit or loss, transaction costs that are directly attributable to the acquisition of the financial assets. Transaction costs of financial assets carried at fair value through profit or loss are expensed in profit or loss.

2.15 Debt instruments

Subsequent measurement of debt instruments depends on the Company's business model for managing the asset and the cash flow characteristics of the asset. There are three measurement categories into which the Company classifies its debt instruments:

i. Amortized cost:

Assets that are held for collection of contractual cash flows where those cash flows represent solely payments of principal and interest are measured at amortized cost. A gain or loss on a debt investment that is subsequently measured at amortized cost is recognized in profit or loss when the asset is derecognized or impaired. Interest income from these financial assets is included in other income using the effective interest rate method.

ii. Fair value through Other Comprehensive Income (FVOCI):

Assets that are held for collection of contractual cash flows and for selling the financial assets, where the assets' cash flows represent solely payments of principal and interest, are measured at FVOCI. Movements in the carrying amount are taken through OCI, except for the recognition of impairment gains or losses, interest revenue and foreign exchange gains and losses which are recognized in profit and loss. When the financial asset is derecognized, the cumulative gain or loss previously recognized in OCI is reclassified from equity to profit or loss and recognized in other gains/ (losses). Interest income from these financial assets is included in other income using the effective interest rate method.

iii. Fair Value through Profit or Loss (FVTPL):

Assets that do not meet the criteria for amortized cost or FVOCI are measured at FVTPL. A gain or loss on a debt investment that is subsequently measured at fair value through profit or loss is recognized in profit or loss in the period in which it arises. Interest income from these financial assets is included in other income.

2.16 Impairment of financial assets:

The Company assesses on a forward looking basis the expected credit losses associated with its assets carried at amortized cost. The impairment methodology applied depends on whether there has been a significant increase in credit risk.

For trade receivables only, the Company applies the simplified approach permitted by Ind AS 109- 'Financial Instruments', which requires expected lifetime losses to be recognized from initial recognition of the receivables.

2.17 Derecognition of financial assets

A financial asset is derecognized only when:

- i. The Company has transferred the rights to receive cash flows from the financial asset or
- ii. retains the contractual rights to receive the cash flows of the financial asset, but assumes a contractual obligation to pay the cash flows to one or more recipients.

Where the entity has transferred an asset, the Company evaluates whether it has transferred substantially all risks and rewards of ownership of the financial asset. In such cases, the financial asset is derecognized. Where the entity has not transferred substantially all risks and rewards of ownership of the financial asset, the financial asset is not derecognized. Where the entity has neither transferred a financial asset nor retains substantially all risks and rewards of ownership of the financial asset, the financial asset is derecognized if the Company has not retained control of the financial asset. Where the group retains control of the financial asset, the asset is continued to be recognized to the extent of continuing involvement in the financial asset.

2.18 Contributed equity:

Equity shares are classified as equity. Incremental costs directly attributable to the issue of new shares or options are shown in equity as a deduction, net of tax from the proceeds.

2.19 Financial liabilities:

i. Classification as debt or equity

Debt and equity instruments issued by the Company are classified as either financial liabilities or as equity in accordance with the substance of the contractual arrangements and the definition of a financial liability and an equity instrument.

An equity instrument is any contract that evidences a residual interest in the assets of an entity after deducting all of its liabilities.

ii. Initial recognition and measurement:

All financial liabilities are recognized initially at fair value and, in the case of loans and borrowings and payables, net of directly attributable transaction costs.

The Company's financial liabilities include trade and other payables, loans and borrowings including bank overdrafts and financial guarantee contracts.

iii. Subsequent measurement:

The measurement of financial liabilities depends on their classification, as described below:

Atlantaa Limited (formerly known as Atlanta Limited)
Corporate General information and Summary of significant accounting policies for the year ended March 31, 2024

(₹ in Lakhs)

iv. Borrowings:

Borrowings are subsequently carried at amortized cost; any difference between the proceeds (net of transaction costs) and the redemption value is recognized in the Statement of Profit and Loss over the period of the borrowings using the effective interest rate method.

Fees paid on the establishment of loan facilities are recognized as transaction costs of the loan to the extent that it is probable that some or all of the facility will be drawn down. In this case, the fee is deferred until the drawdown occurs. To the extent there is no evidence that it is probable that some or all of the facility will be drawn down, the fee is capitalized as a pre-payment for liquidity services and amortized over the period of the facility to which it relates.

v. Trade and other payables:

These amounts represent obligations to pay for goods or services that have been acquired in the ordinary course of business from suppliers. Those payable are classified as current liabilities if payment is due within one year or less otherwise they are presented as non-current liabilities. Trade and other payables are subsequently measured at amortized cost using the effective interest rate method.

vi. Financial guarantee contracts:

Financial guarantee contracts are recognized as a financial liability at the time when guarantee is issued. The liability is initially at fair value and subsequently at the higher of the amount determined in accordance with Ind AS 37 and the amount initially recognized less cumulative amortization, where appropriate.

Where guarantees in relation to loans of subsidiaries are provided for no compensation, the fair values as on the date of transition are accounted for as contribution and recognized as part of the cost of the equity investment.

vii Derecognition:

Borrowings are removed from the Balance Sheet when the obligation specified in the contract is discharged, cancelled or expired. The difference between the carrying amount of a financial liability that has been extinguished or transferred to another party and the consideration paid, including any non-cash assets transferred or liabilities assumed, is recognized in profit or loss as other gains (losses). When an existing financial liability is replaced by another from the same lender on substantially different terms, or the terms of an existing liability are substantially modified, such an exchange or modification is treated as the derecognition of the original liability and the recognition of a new liability. The difference in the respective carrying amounts is recognized in the Statement of Profit and Loss.

2.20 Borrowing costs:

General and specific borrowing costs that are directly attributable to the acquisition, construction or production of a qualifying asset are capitalized during the period of time that is required to complete and prepare the asset for its intended use or sale. Qualifying assets are assets that necessarily take a substantial period of time to get ready for their intended use or sale. Investment income earned on the temporary investment of specific borrowings pending their expenditure on qualifying assets is deducted from the borrowing costs eligible for capitalization. Other borrowing costs are expensed in the period in which they are incurred.

2.21 Provisions, Contingent Liabilities and Contingent Assets:

i. Provisions

Provisions are recognized when the Company has a present legal or constructive obligation as a result of past events; it is probable that an outflow of resources will be required to settle the obligation; and the amount has been reliably estimated.

Provisions are measured at the present value of management's best estimate of the expenditure required to settle the present obligation at the end of the reporting period. The discount rate used to determine the present value is a pre-tax rate that reflects current market assessments of the time value of money and the risks specific to the liability. The increase in the provision due to the passage of time is recognized as interest expense.

ii. Contingent Liabilities

Contingent liabilities are disclosed when there is a possible obligation arising from past events, the existence of which will be confirmed only by the occurrence or non-occurrence of one or more uncertain future events not wholly within the control of the Company. A present obligation that arises from past events where it is either not probable that an outflow of resources will be required to settle or reliable estimate of the amount cannot be made, is termed as contingent liability.

iii. Contingent Assets

A contingent asset is disclosed, where an inflow of economic benefits is probable.

2.22 Revenue recognition:

Revenue is measured at the fair value of the consideration received or receivable, and represents amount receivable for goods supplied, stated net of discounts, returns, value added taxes and Goods and service tax (GST).

i. Revenue from Toll operations

Income from toll contracts on Build Operate and Transfer (BOT) basis are recognized on actual collection of toll revenue as per the Concession agreement.

Additional claim including escalations, which in the opinion of the management, are recoverable on the contract are recognized at the time of evaluating the job.

Revenue from toll collection is recognized on the receipt of toll from users of the concession facility.

Atlanta Limited (formerly known as Atlanta Limited)
Corporate General information and Summary of significant accounting policies for the year ended March 31, 2024

ii. Revenue from construction contracts

(₹ in Lakhs)

Ind AS 115 establishes a five-step model to account for revenue arising from contracts with customers. Under Ind AS 115, revenue is recognized at an amount that reflects the consideration to which an entity expects to be entitled in exchange for transferring goods or services to a customer.

This standard requires revenue to be recognized when promised goods or services are transferred to customers in amounts that reflect the consideration to which the company expects to be entitled in exchange for those goods or services.

When the outcome of a construction contract can be estimated reliably and it is probable that the contract will be profitable, contract revenue is recognized over the period of the contract by reference to the stage of completion. Contract revenue is measured at the fair value of the consideration received or receivable.

For the purpose of recognizing revenue, contract revenue comprises the initial amount of revenue agreed in the contract, the variations in contract work, claims and incentive payments to the extent that its receipt is considered probable and the amounts are capable of being reliably measured.

Contract cost are recognized as expenses by reference to the stage of completion of the contract activity at the end of the reporting period. When it is probable that total contract costs will exceed the total contract revenue, the expected loss is recognized as an expense immediately.

When the outcome of a construction contract cannot be estimated reliably, contract revenue is recognized only to the extent of contract costs incurred that are likely to be recoverable.

Claims and amount in respect thereof are recognized only when the negotiations have advanced to a stage where it is probable that the customers will accept them and amount can be reliably measured. In the case of Arbitration awards and disputed claims pertaining to construction contracts revenue is recognized when the claims are granted in favor of the Company and where it is reasonable to expect the ultimate collection of such arbitration awards / disputed claims pertaining to construction contracts.

The Company evaluates whether it is acting as a principal or agent by considering a number of factors which includes inventory risk, customer's credit risk for the amount receivable from the customer, primary responsibility for providing goods and services to the consumer. Where the Company is acting as an principal in the transaction, revenue and related costs are recorded at their gross values. Where the Company is effectively acting as an agent in the transaction, revenue and related costs are recorded at their net values.

iii. Revenue recognition on account of arbitration/litigation claims

The Company has exercised judgment over recognition of revenue arising on account of claims made by the Company to the customer on account of several breaches committed by the customer during the period of contract, dispute over quantity and rates of materials used in execution of the project leading to dispute which has been settled vide arbitration process and the outcome of these awards including the timing and the amount of revenue recognition requires a reasonable degree of estimation.

2.23 Income and recognition:

i. Interest income

Interest income from debt instruments is recognized using the effective interest rate method. The effective interest rate is the rate that exactly discounts estimated future cash receipts through the expected life of the financial asset to the gross carrying amount of a financial asset. When calculating the effective interest rate, the Company estimates the expected cash flows by considering all the contractual terms of the financial instrument (for example prepayment, extension, call and similar options) but does not consider the expected credit losses.

ii. Rental income

Rental income arising from operating lease on investment properties is accounted for on a straight line basis over lease terms unless the receipts are structured to increase in line with expected general inflation to compensate for the expected inflationary cost increases and is included in the Statement of profit or loss due to its operating nature.

iii. Dividend

Dividends are recognized in profit or loss only when the right to receive payment is established, it is probable that the economic benefits associated with the dividend will flow to the Company, and the amount of the dividend can be measured reliably.

2.24 Retirement and other employee benefits:

i. Short-term obligations

Liabilities for wages and salaries, including non-monetary benefits that are expected to be settled wholly within 12 months after the end of the period in which the employees render the related service are recognized in respect of employees' services up to the end of the reporting period and are measured at the amounts expected to be paid when the liabilities are settled. The liabilities are presented as current employee benefit obligations in the balance sheet.

ii. Other long-term employee benefit obligations

The liabilities for earned leave and sick leave are not expected to be settled wholly within 12 months after the end of the period in which the employees render the related service. They are therefore measured as the present value of expected future payments to be made in respect of services provided by employees up to the end of the reporting period using the projected unit credit method. The benefits are discounted using the market yields at the end of the reporting period that have terms approximating to the terms of the related obligation. Re-measurements as a result of experience adjustments and changes in actuarial assumptions are recognized in Statement of Profit or Loss.

The obligations are presented as current liabilities in the balance sheet if the entity does not have an unconditional right to defer settlement for at least twelve months after the reporting period, regardless of when the actual settlement is expected to occur.

Atlantaa Limited (formerly known as Atlanta Limited)
Corporate General information and Summary of significant accounting policies for the year ended March 31, 2024

(₹ in Lakhs)

iii. Post-employment obligations

a. Gratuity obligations

The liability or asset recognized in the balance sheet in respect of defined benefit gratuity plans is the present value of the defined benefit obligation at the end of the reporting period less the fair value of plan assets. The defined benefit obligation is calculated annually by actuaries using the projected unit credit method.

The present value of the defined benefit obligation denominated in Rupees is determined by discounting the estimated future cash outflows by reference to market yields at the end of the reporting period on government bonds that have terms approximating to the terms of the related obligation.

The net interest cost is calculated by applying the discount rate to the net balance of the defined benefit obligation and the fair value of plan assets. This cost is included in employee benefit expense in the Statement of Profit and Loss.

Re-measurement gains and losses arising from experience adjustments and changes in actuarial assumptions are recognized in the period in which they occur, directly in Other Comprehensive Income. They are included in Retained Earnings in the Statement of Changes in Equity and in the Balance Sheet.

Changes in the present value of the defined benefit obligation resulting from plan amendments or curtailments are recognized immediately in profit or loss as past service cost.

b. Defined contribution plans

Provident fund

The Company pays provident fund contributions to publicly administered provident funds as per local regulations. The Company has no further payment obligations once the contributions have been paid. The contributions are accounted for as defined contribution plans and the contributions are recognized as employee benefit expense when they are due. Prepaid contributions are recognized as an asset to the extent that a cash refund or a reduction in the future payments is available.

2.25 Income tax:

The income tax expense or credit for the period is the tax payable on the current period's taxable income based on the applicable income tax rate for each jurisdiction adjusted by changes in deferred tax assets and liabilities attributable to temporary differences and to unused tax losses.

The current income tax charge is calculated on the basis of the tax laws enacted or substantively enacted at the end of the reporting period. Management periodically evaluates positions taken in tax returns with respect to situations in which applicable tax regulation is subject to interpretation. It establishes provisions where appropriate on the basis of amounts expected to be paid to the tax authorities.

Deferred income tax is provided in full, on temporary differences arising between the tax base of assets and liabilities and their carrying amounts in the financial statements. Deferred income tax is also not accounted for if it arises from initial recognition of an asset or liability in a transaction other than a business combination that at the time of the transaction affects neither accounting profit nor taxable profit (tax loss). Deferred income tax is determined using tax rates (and laws) that have been enacted or substantially enacted by the end of the reporting period and are expected to apply when the related deferred income tax asset is realized or the deferred income tax liability is settled.

Deferred tax assets are recognized for all deductible temporary differences and unused tax losses only if it is probable that future taxable amounts will be available to utilize those temporary differences and losses. Deferred tax assets and liabilities are offset when there is a legally enforceable right to offset current tax assets and liabilities. Current tax assets and tax liabilities are offset where the entity has a legally enforceable right to offset and intends either to settle on a net basis or to realize the asset and settle the liability simultaneously.

Current and deferred tax is recognized in profit or loss, except to the extent that it relates to items recognized in Other Comprehensive Income or directly in equity. In this case, the tax is also recognized in Other Comprehensive Income or directly in equity, respectively.

2.26 Earnings per share:

Basic earnings per share

Basic earnings per share is calculated by dividing:

- the profit attributable to equity shareholder of the Company
- by the weighted average number of equity shares outstanding during the financial year.

Diluted earnings per share

Diluted earnings per share adjust the figures used in the determination of basic earnings per share to take into account:

- the after income tax effect of interest and other financing costs associated with dilutive potential equity shares, and
- the weighted average number of additional equity shares that would have been outstanding assuming the conversion of all dilutive potential equity shares.

2.27 Cash flow statement:

Cash flows are reported using the indirect method, whereby profit before tax is adjusted for the effects of transactions of non-cash nature and any deferrals or accruals of past or future cash receipts or payments. The cash flows from operating, investing and financing activities of the Company are segregated based on the available information.

2.28 Segment reporting:

Operating segments are reported in a manner consistent with the internal reporting provided to the Chief Operating Decision-Maker. The chief operating decision-maker, who is responsible for allocating resources and assessing performance of the operating segments, has been identified as the Managing Director and the Chief Financial Officer that makes strategic decisions.

2.29 Business combinations:

Business combinations involving entities that are controlled by the Company are accounted for using the pooling of interests method as follows:

- i. The assets and liabilities of the combining entities are reflected at their carrying amounts.
 - ii. No adjustments are made to reflect fair values, or recognize any new assets or liabilities.
 - iii. Adjustments are only made to harmonies accounting policies.
- iv. The financial information in the financial statements in respect of prior periods is restated as if the business combination had occurred from the beginning of the preceding period in the financial statements, irrespective of the actual date of the combination. However, where the business combination had occurred after that date, the prior period information is restated only from that date.
- v. The balance of the retained earnings appearing in the financial statements of the transferor is aggregated with the corresponding balance appearing in the financial statements of the transferee or is adjusted against General Reserve.

The identities of the reserves are preserved and the reserves of the transferor become the reserves of the transferee.

- vi. The difference, if any, between the amounts recorded as share capital issued plus any additional consideration in the form of cash or other assets and the amount of share capital of the transferor is transferred to capital reserve and is presented separately from other capital reserves.

2.30 Critical accounting estimates and judgments:

The preparation of the financial statements under Ind AS requires management to take decisions and make estimates and assumptions that may impact the value of revenues, costs, assets and liabilities and the related disclosures concerning the items involved as well as contingent assets and liabilities at the balance sheet date. Estimates and judgments are continually evaluated and are based on historical experience and other factors, including expectations of future events that are believed to be reasonable under the circumstances.

The Company makes estimates and assumptions concerning the future. The resulting accounting estimates will, by definition, seldom equal the related actual results. The estimates and assumptions that have a significant risk of causing a material adjustment to the carrying amounts of assets and liabilities within the next financial year.

2.31 Classifications of Joint Arrangement as Jointly Controlled Operations

The Company based on rights and obligations that arises from the contractual arrangement entered into between the parties has classified certain Joint Arrangements entered into by the Company with parties to execute the construction contracts as Jointly Controlled Operations where the contractual agreement provides rights to assets and obligations for liabilities for those parties sharing joint control and the legal form does not confer separation between the investors and the special purpose vehicle i.e. partnership firms formed under the Indian Partnership Act, 1932 to execute the project.

2.32 Expected Credit Loss

Company has a policy of regularly reviewing the recoverability of trade receivables. Substantial amount of trade receivables of the Company represents amount recoverable from the customers arising on account of arbitration claims pending against the Company. The expected credit loss allowance for trade receivables is made as per provision policy of the Company which takes into account the historical credit loss experience and adjusted for forward looking information.

Notes on financial statements- 3 to 20

Cash flows are reported using the indirect method, whereby profit for the period is adjusted for the effects of transactions of a non-cash nature, any deferrals or accruals of past or future operating cash receipts or payments and item of income or expenses associated with investing or financing cash flows. The cash flows from operating, investing and financing activities of the Company are segregated. The Company considers all highly liquid investments that are readily convertible to known amounts of cash to be cash equivalents.

The said SPV has completed the said project and received Commercial Operation Certificate from the competent Authority on 08-11-2016 and having right to collect the toll from the users of the facility during the concession period.

On 05-08-2021 the Authority (PIDB) has terminated the Concession Agreement vide letter no.PWD-BR-3012/21/2021-3BR3/178/1 dated.05-08-2021. By virtue of termination of Concession Agreement, the BOT (Intangible Asset) and toll collection right have been takeover

7 Employee benefit obligations

The Company has classified various employee benefits as under:

a. Defined contribution plans

- i. Provident fund
- ii. Employees’ Pension Scheme, 1995

Atlanta Limited (formerly known as Atlanta Limited)
Notes to the financial statements as of and for the year ended on March 31, 2024

(₹ in Lakhs)

The provident fund and the state defined contribution plan are operated by the regional provident fund commissioner. Under the schemes, the Company is required to contribute a specified percentage of payroll cost to the retirement benefit schemes to fund the benefits.

The Company has recognized the following amounts in the Statement of Profit and Loss for the year:

(₹ in Lakhs)

<i>Particulars</i>	<i>31-Mar-24</i>	<i>31-Mar-23</i>
Contribution to provident fund	1.03	1.04
Contribution to employees' pension scheme 1995	2.21	1.92
Total	3.24	2.96

c. Post employment obligation

Gratuity

The Company has a defined benefit plan, governed by the Payment of Gratuity Act, 1972. The plan entitles an employee, who has rendered at least five years of continuous service, to gratuity at the rate of fifteen days basic salary for every completed years of services or part thereof in excess of six months, based on the rate of basic salary last drawn by the employee concerned.

i. Significant estimates: actuarial assumptions

Valuations in respect of gratuity have been carried out by an independent actuary, as at the Balance Sheet date,

Based on the following assumptions:

<i>Particulars</i>	<i>31-Mar-24</i>	<i>31-Mar-23</i>
Discount rate (per annum)	7.10%	7.30%
Rate of increase in compensation levels	5.00%	5.00%
Withdrawal Rates	15.00% p.a at all ages	15.00% p.a at all ages

The estimate of rate of escalation in salary considered in actuarial valuation, takes into account inflation, seniority, promotion and other relevant factors including supply and demand in the employment market.

<i>Gratuity Plan</i>	<i>31-Mar-24</i>	<i>31-Mar-23</i>
Particulars	Present value of obligation	Present value of obligation
Opening balance	143.48	118.06
Current service cost	7.25	6.64
Interest cost	6.88	4.78
Total amount recognized in Statement of Profit and Loss	14.14	11.42
Remeasurements during the year		
Return on plan assets, excluding amount included in interest expense/(income)	NA	NA
(Gain) / loss from change in financial assumptions	0.24	(6.33)

iii. Sensitivity analysis:

<i>Particulars</i>	<i>31-Mar-24</i>	<i>31-Mar-23</i>
<i>Discount rate Sensitivity</i>	<i>160.13</i>	<i>142.17</i>
> <i>Increase by 0.5%</i>	<i>-0.37%</i>	<i>-0.91%</i>
> <i>(% change)</i>	<i>161.36</i>	<i>144.85</i>
> <i>Decrease by 0.5%</i>	<i>0.39%</i>	<i>0.95%</i>
> <i>(% change)</i>	<i>-</i>	<i>-</i>
<i>Salary growth rate Sensitivity</i>	<i>161.03</i>	<i>144.87</i>
> <i>Increase by 0.5%</i>	<i>0.19%</i>	<i>0.97%</i>
> <i>(% change)</i>	<i>160.40</i>	<i>142.14</i>
> <i>Decrease by 0.5%</i>	<i>-0.20%</i>	<i>-0.94%</i>
> <i>(% change)</i>	<i>-</i>	<i>-</i>
<i>Withdrawal rate (W.R.) Sensitivity</i>	<i>161.12</i>	<i>143.91</i>
> <i>W.R. x 110%</i>	<i>0.24%</i>	<i>0.30%</i>
> <i>(% change)</i>	<i>160.31</i>	<i>143.00</i>
> <i>W.R. x 90%</i>	<i>-0.26%</i>	<i>-0.33%</i>
> <i>(% change)</i>		

The above sensitivity analyses are based on a change in an assumption while holding all other assumptions constant. In practice, this is unlikely to occur, and changes in some of the assumptions may be correlated. While calculating the sensitivity of the defined benefit obligation to significant actuarial assumptions the same method (present value of the defined benefit obligation calculated with the projected unit credit method at the end of the reporting period) has been applied as when calculating the defined benefit liability recognized in the balance sheet. The methods and types of assumptions used in preparing the sensitivity analysis did not change compared to the prior period.

13 Fair value measurements

The carrying amounts of trade receivables, cash and cash equivalents, bank balance other than cash and cash equivalents, other financial assets, trade payables, capital creditors are considered to be same as their fair values, due to their Short-term nature.

The carrying value of borrowings, deposits given and taken and other financial assets and liabilities are considered to be reasonably same as their fair values. These are classified as level 3 fair values in the fair value hierarchy due to the inclusion of unobservable inputs including counter party credit risk

c) Fair value hierarchy

This section explains the judgment's and estimates made in determining the fair values of the financial instruments that are (a) recognized and measured at fair value and (b) measured at amortized cost and for which fair values are disclosed in the financial statements. To provide an indication about the reliability of the inputs used in determining fair value, the company has classified its financial instruments into the three levels prescribed under the accounting standard. An explanation of each level follows underneath the table.

d) Valuation processes

The Company obtains assistance of independent and competent third party valuation experts to perform the valuations of financial assets and liabilities required for financial reporting purposes, including level 3 fair values. Discussions of valuation processes and results are held between the Company and the value on periodically basis.

e) Valuation technique used to determine fair values

The main level 3 inputs used by the Company are derived and evaluated as follows:

The fair value of financial instruments is determined using discounted cash flow analysis.

The carrying amount of current financial assets and liabilities are considered to be the same as their fair values, due to their short term nature.

The fair value of the long-term Borrowings with floating-rate of interest is not impacted due to interest rate changes, and will not be significantly different from their carrying amounts as there is no significant change in the under-lying credit risk of the Company borrowing (since the date of inception of the loans). Further, the Company has no long-term Borrowings with fixed rate of interest.

For financial assets and liabilities that are measures at fair value, the carrying amount is equal to the fair values.

Note:

Level 1: Level 1 hierarchy includes financial instruments measured using quoted prices.

Level 2: The fair value of financial instruments that are not traded in an active market (for example over-the-counter derivatives) is determined using valuation techniques which maximize the use of observable market data and rely as little as possible on entity-specific estimates. If all significant inputs required to fair value an instrument are observable, the instrument is included in level 2.

Level 3: If one or more of the significant inputs is not based on observable market data, the instrument is included in level 3. This is the case for unlisted equity securities which are included in level 3.

There are no transfers between any levels during the year.

The Company's policy is to recognize transfer into and transfer out of fair value hierarchy levels as at the end of the reporting period.

14 Financial risk management

The Company's business activities expose it to a variety of financial risks, namely liquidity risk, market risks and credit risk.

Risk	Exposure arising from	Measurement	Management
Credit Risk	Cash and cash equivalents, trade receivables, financial assets measured at amortized cost.	Ageing analysis	Diversification of bank deposits, letters of credit
Liquidity Risk	Borrowings and other liabilities	Rolling cash flow forecasts	Availability of committed credit lines and borrowing facilities
Market risk-interest rate	Long-term borrowings at variable rates	Sensitivity analysis	Un hedged

a. Credit risk

(₹ in Lakhs)

The Company is exposed to credit risk, which is the risk that counterparty will default on its contractual obligation resulting in a financial loss to the Company

Credit risk arises from cash and cash equivalents, financial assets carried at amortized cost and deposits with banks and financial institutions, as well as credit exposures to trade customers including outstanding receivables.

Credit risk management

Credit risk is the risk that a counterparty will not meet its obligations under a financial instrument or customer contract, leading to a financial loss.

The Company's credit risk arises from accounts receivable balances. Major customers of the Companies include public sector enterprises and state owned companies having high credit quality. Accordingly, the Company's customer credit risk is very low. With respect to intercorporate deposits/ loans given to subsidiaries, the Company will be able to control the cash flows of those subsidiaries as the subsidiaries are wholly owned by the Company.

For banks and financial institutions, only highly rated banks/institutions are accepted. Generally all policies surrounding credit risk have been managed at company level.

The Company is making provision for trade receivables based on Expected Credit Loss (ECL) model. The reconciliation of ECL is as below:

Particulars	Note	31-Mar-24	31-Mar-23
Opening balance		-	-
Changes in loss allowance (Provision for doubtful debts):		-	-
Loss allowance based on ECL		-	-
Additional Provision		-	-
Bad-debts		-	-
Closing balance		-	-

b. Liquidity risk

Prudent liquidity risk management implies maintaining sufficient cash and marketable securities and the availability of funding through an adequate amount of committed credit facilities to meet obligations when due and to close out market positions. Due to the dynamic nature of the underlying businesses, company treasury maintains flexibility in funding by maintaining availability under committed credit lines.

Management monitors rolling forecasts of the Company's liquidity position and cash and cash equivalents on the basis of expected cash flows. This is generally carried out at local level in the operating subsidiaries of the Company in accordance with practice and limits set by the Company. These limits vary by location to take into account the liquidity of the market in which the entity operates. In addition, the Company's liquidity management policy involves projecting cash flows in major currencies and considering the level of liquid assets necessary to meet these monitoring balance sheet liquidity ratios against internal and external regulatory requirements and maintaining debt financing plans.

i Maturities of financial liabilities

The amounts disclosed below are the contractual undiscounted cash flows. Balances due within 12 months equal their carrying balances as the impact of discounting is not significant

(₹ in Lakhs)

c Market risk

Market risk is the risk that the fair values of future cash flows of a financial instrument will fluctuate because of volatility of prices in the financial markets. Market risk can be further segregated as: a) Foreign currency risk and b) Interest rate risk.

(i) Foreign currency risk

Foreign currency risk is the risk that the fair value or future cash flows of a financial instrument will fluctuate because of changes in foreign exchange rates. Company does not have any foreign currency loans, receivables or payables, hence the risk towards foreign currency risk is not applicable to the Company.

For that reason, sensitivity analysis with respect to foreign currency risk has not been disclosed

(ii) Interest rate risk

Interest rate risk is the risk that the fair value or future cash flows of a financial instrument will fluctuate because of changes in market interest rates. The Company's main interest rate risk arises from long-term borrowings with variable rates, which expose the Company to cash flow interest rate risk. During March 31, 2024, March 31, 2023 and March 31, 2022 of the Company's borrowings at variable rate were mainly denominated in Rupees.

The Company's fixed rate borrowings are carried at amortized cost. They are therefore not subject to interest rate risk as defined in Ind AS-107, since neither the carrying amount nor the future cash flows will fluctuate because of a change in market interest rates.

15 Capital Management

i. Risk Management

The Company's objectives when managing capital are to safeguard the Company's ability to continue as a going concern in order to provide returns for shareholders and benefits for other stakeholders and to maintain an optimal capital structure to reduce the cost of capital. In order to maintain or adjust the capital structure, the Company may adjust the amount of dividends paid to shareholders, return capital to shareholders, issue new shares or sell assets to reduce debt.

The Company monitors capital on basis of total equity and debt on a periodic basis. Equity comprises all components of equity. Debt includes term loan, others and short term loans. The following table summarizes the capital of the Company:

Particulars	Note	31-Mar-2024	31-Mar-2023
Equity (excluding other reserves)	3.16 & 3.17	27,132.37	22,236.26
Debt (current maturities and interest due)	3.18	1,402.83	6.67

7	Trade payable turnover ratio (in times)	Cost of operations	Average trade payables	Refer note 2	Refer note 2		
8	Net capital turnover ratio (in times)	Revenue from operations	Average working capital (ie. Total current assets less Total current liabilities)	Refer note 2	Refer note 2		
9	Net profit ratio (in%)	Profit for the year	Revenue from operations	Refer note 2	Refer note 2		
10	Return on capital employed (in %)	Profit before tax and finance cost	Capital employed=Net worth+ Lease liabilities+deferred tax liabilities	Refer note 2	Refer note 2		
11	Return on investments (in %)	Income generated from invested funds	Average invested funds in investments	Refer note 2	Refer note 2		

Note: Formula for computation of ratios are as follows:

1 Figures for the previous periods have been regrouped/reclassified to conform to the classification of the current periods.

2 These ratio are not applicable to company as company does not have operational activity hence there is no operational income and expenditure and also no secured debt from Banks and financial institutions. Under the circumstances these ratio if calculated, will give an absurd result.

**INDEPENDENT AUDITOR'S REPORT
TO THE MEMBERS OF ATLANTAA LIMITED
Report on the Audit of the Consolidated Ind AS Financial Statements**

Opinion

We have audited the accompanying Consolidated Ind AS Financial Statements of Atlantaa Limited ("the Company") and its subsidiaries (the Company and its subsidiaries together referred to as "the Group"), which comprise the Consolidated Balance Sheet as at March 31, 2024, the Consolidated Statement of Profit and Loss (including Other Comprehensive Income), the Consolidated Statement of Changes in Equity and the Consolidated Statement of Cash Flows for the year ended on that date, and a summary of the significant accounting policies and other explanatory information (hereinafter referred to as "the Consolidated Ind AS Financial Statements"). In our opinion and to the best of our information and according to the explanations given to us, the aforesaid Consolidated Ind AS Financial Statements give the information required by the Companies Act, 2013 (the "Act") in the manner so required and give a true and fair view in conformity with Indian Accounting Standards prescribed under section 133 of the Act read with the Companies (Indian Accounting Standards) Rules, 2015, as amended ("Ind AS") and other accounting principles generally accepted in India, of the consolidated state of affairs of the Group as at March 31, 2024, the consolidated profit, consolidated total comprehensive income, consolidated changes in equity and its consolidated cash flows for the year ended on that date.

Basis for Opinion

We conducted our audit of the Consolidated Ind AS Financial Statements in accordance with the Standards on Auditing (SAs) specified under section 143(10) of the Act (SAs). Our responsibilities under those Standards are further described in the Auditor's Responsibilities for the Audit of the Consolidated Ind AS Financial Statements section of our report. We are independent of the Group in accordance with the Code of Ethics issued by the Institute of Chartered Accountants of India (ICAI) together with the independence requirements that are relevant to our audit of the Consolidated Ind AS Financial Statements under the provisions of the Act and the Rules made thereunder, and we have fulfilled our other ethical responsibilities in accordance with these requirements and the ICAI's Code of Ethics. We believe that the audit evidence we have obtained is sufficient and appropriate to provide a basis for our audit opinion on the Consolidated Ind AS Financial Statements.

Key Audit Matters

Key audit matters are those matters that, in our professional judgment, were of most significance in our audit of the Consolidated Ind AS Financial Statements of the current period. These matters were addressed in the context of our audit of the Consolidated Ind AS Financial Statements as a whole, and in forming our opinion thereon, and we do not provide a separate opinion on these matters. We have not determined any matter described to be the key audit matters to be communicated in our report.

Information Other than the Consolidated Ind AS Financial Statements and Auditor's Report Thereon

The Company's Board of Directors is responsible for the preparation of the other information. The other information comprises the information included in the Management Discussion and Analysis, Board's Report including Annexures to Board's Report, Business Responsibility Report, Corporate Governance and Shareholder's Information, but does not include the Consolidated Ind AS Financial Statements and our auditor's report thereon. Our opinion on the Consolidated Ind AS Financial Statements does not cover the other information and we do not express any form of assurance conclusion thereon.

In connection with our audit of the Consolidated Ind AS Financial Statements, our responsibility is to read the other information and, in doing so, consider whether the other information is materially inconsistent with the Consolidated Ind AS Financial Statements or our knowledge obtained during the course of our audit or otherwise appears to be materially misstated.

If, based on the work we have performed, we conclude that there is a material misstatement of this other information, we are required to report that fact. We have nothing to report in this regard.

Management's Responsibility for the Consolidated Ind AS Financial Statements

The Company's Board of Directors is responsible for the matters stated in section 134(5) of the Act with respect to preparation of these Consolidated Ind AS Financial Statements that give a true and fair view of the consolidated financial position, consolidated financial performance, consolidated total comprehensive income, consolidated changes in equity and consolidated cash flows of the Group in accordance with the Ind AS and other accounting principles generally accepted in India. The respective Board of Directors of the companies included in the Group are responsible for maintenance of the adequate accounting records in accordance with the provisions of the Act for safeguarding the assets of the Group and for preventing and detecting frauds and other irregularities; selection and application of appropriate accounting policies; making judgments and estimates that are reasonable and prudent; and design, implementation and maintenance of adequate internal financial controls, that were operating effectively for ensuring the accuracy and completeness of the accounting records, relevant to the preparation and presentation of the Consolidated Ind AS Financial Statements that give a true and fair view and are free from material misstatement, whether due to fraud or error. In preparing the Consolidated Ind AS Financial Statements, the respective Board of Directors of the companies included in the Group are responsible for assessing the Group's ability to continue as a going concern, disclosing, as applicable, matters related to going concern and using the going concern basis of accounting unless management either intends to liquidate the Group or to cease operations, or has no realistic alternative but to do so.

The respective Board of Directors of the companies included in the Group are also responsible for overseeing the financial reporting process of the Group.

Auditor's Responsibilities for the Audit of the Consolidated Ind AS Financial Statements

Our objectives are to obtain reasonable assurance about whether the Consolidated Ind AS Financial Statements as a whole are free from material misstatement, whether due to fraud or error, and to issue an auditor's report that includes our opinion. Reasonable assurance is a high level of assurance, but is not a guarantee that an audit conducted in accordance with SAs will always detect a material misstatement when it exists. Misstatements can arise from fraud or error and are considered material if, individually or in the aggregate, they could reasonably be expected to influence the economic decisions of users taken on the basis of these Consolidated Ind AS Financial Statements.

As part of an audit in accordance with SAs, we exercise professional judgment and maintain professional scepticism throughout the audit. We also:

- Identify and assess the risks of material misstatement of the Consolidated Ind AS Financial Statements, whether due to fraud or error, design and perform audit procedures responsive to those risks, and obtain audit evidence that is sufficient and appropriate to provide a basis for our opinion. The risk of not detecting a material misstatement resulting from fraud is higher than for one resulting from error, as fraud may involve collusion, forgery, intentional omissions, misrepresentations, or the override of internal control.

- Obtain an understanding of internal financial controls relevant to the audit in order to design audit procedures that are appropriate in the circumstances. Under section 143(3)(I) of the Act, we are also responsible for expressing our opinion on whether the Company and its subsidiary companies which are companies incorporated in India, has adequate internal financial controls system in place and the operating effectiveness of such controls.
- Evaluate the appropriateness of accounting policies used and the reasonableness of accounting estimates and related disclosures made by management.
- Conclude on the appropriateness of management's use of the going concern basis of accounting and, based on the audit evidence obtained, whether a material uncertainty exists related to events or conditions that may cast significant doubt on the ability of the Group to continue as a going concern. If we conclude that a material uncertainty exists, we are required to draw attention in our auditor's report to the related disclosures in the Consolidated Ind AS Financial Statements or, if such disclosures are inadequate, to modify our opinion. Our conclusions are based on the audit evidence obtained up to the date of our auditor's report. However, future events or conditions may cause the Group to cease to continue as a going concern.
- Evaluate the overall presentation, structure and content of the Consolidated Ind AS Financial Statements, including the disclosures, and whether the Consolidated Ind AS Financial Statements represent the underlying transactions and events in a manner that achieves fair presentation.
- Obtain sufficient appropriate audit evidence regarding the financial information of the entities or business activities within the Group to express an opinion on the Consolidated Ind AS Financial Statements. We are responsible for the direction, supervision and performance of the audit of the financial statements of such entities included in the Consolidated Ind AS Financial Statements.

Materiality is the magnitude of misstatements in the Consolidated Ind AS Financial Statements that, individually or in aggregate, makes it probable that the economic decisions of a reasonably knowledgeable user of the financial statements may be influenced. We consider quantitative materiality and qualitative factors in (i) planning the scope of our audit work and in evaluating the results of our work; and (ii) to evaluate the effect of any identified misstatements in the financial statements.

We communicate with those charged with governance regarding, among other matters, the planned scope and timing of the audit and significant audit findings, including any significant deficiencies in internal control that we identify during our audit.

We also provide those charged with governance with a statement that we have complied with relevant ethical requirements regarding independence, and to communicate with them all relationships and other matters that may reasonably be thought to bear on our independence, and where applicable, related safeguards.

From the matters communicated with those charged with governance, we determine those matters that were of most significance in the audit of the Consolidated Ind AS Financial Statements of the current period and are therefore the key audit matters. We describe these matters in our auditor's report unless law or regulation precludes public disclosure about the matter or when, in extremely rare circumstances, we determine that a matter should not be communicated in our report because the adverse consequences of doing so would reasonably be expected to outweigh the public interest benefits of such communication.

Report on Other Legal and Regulatory Requirements

1. As required by Section 143(3) of the Act, based on our audit we report that:
 - a) We have sought and obtained all the information and explanations which to the best of our knowledge and belief were necessary for the purposes of our audit of the aforesaid Consolidated Ind AS Financial Statements.

- b) In our opinion, proper books of account as required by law relating to preparation of the aforesaid Consolidated Ind AS Financial Statements have been kept so far as it appears from our examination of those books.
- c) The Consolidated Balance Sheet, the Consolidated Statement of Profit and Loss including (including Other Comprehensive Income), Consolidated Statement of Changes in Equity and the Consolidated Statement of Cash Flows dealt with by this Report are in agreement with the relevant books of account maintained for the purpose of preparation of the Consolidated Ind AS Financial Statements.
- d) In our opinion, the aforesaid consolidated financial statements comply with the Ind AS specified under Section 133 of the Act.
- e) On the basis of the written representations received from the directors of the Company as on March 31, 2024 taken on record by the Board of Directors of the Company and its subsidiaries incorporated in India and the reports of the statutory auditors of its subsidiary companies incorporated in India, none of the directors of the Group companies incorporated in India is disqualified as on March 31, 2024 from being appointed as a director in terms of Section 164 (2) of the Act.
- f) With respect to the adequacy of the internal financial controls over financial reporting and the operating effectiveness of such controls, refer to our separate Report in "Annexure A" which is based on the auditor's reports of the Company and its subsidiary companies incorporated in India. Our report expresses an unmodified opinion on the adequacy and operating effectiveness of the internal financial control over financial reporting of those companies, for reasons stated therein.
- g) With respect to the other matters to be included in the Auditor's Report in accordance with the requirements of section 197(16) of the Act, as amended: In our opinion and to the best of our information and according to the explanations given to us, the remuneration paid by the Company to its directors during the year is in accordance with the provisions of section 197 of the Act.
- h) With respect to the other matters to be included in the Auditor's Report in accordance with Rule 11 of the Companies (Audit and Auditors) Rules, 2014, as amended in our opinion and to the best of our information and according to the explanations given to us:
 - i. The Consolidated Ind AS Financial Statements disclose impact of pending litigations on the consolidated financial position of the Group (refer note no.4).
 - ii. The Company did not have any long-term contracts including derivative contract having material foreseeable losses for which provision was required to be made under the applicable law or the accounting standards.
 - iii. There were no amounts which were required to be transferred to the Investor Education and Protection Fund by the Company.
 - iv a) The respective management of the company and its subsidiaries which are companies incorporated in India whose financial statement have been audited under the act, have represented to us that, to the best of it's knowledge and belief, no funds have been advanced or loaned or invested (either from borrowed funds or share premium or any other sources or kind of funds) by the company to or in any other persons or entities, including foreign entities ("Intermediaries"), with the understanding, whether recorded in writing or otherwise, that the Intermediary shall, directly or indirectly lend or invest in other persons or entities identified in any manner whatsoever by or on behalf of the company ("Ultimate Beneficiaries") or provide any guarantee, security or the like on behalf of the Ultimate Beneficiaries;

- b) The respective management of the company and its subsidiaries which are companies incorporated in India whose financial statement have been audited under the act, have represented that, to the best of its knowledge and belief, no funds have been received by the Company from any persons or entities including foreign entities (“Funding Parties”), with the understanding, whether recorded in writing or otherwise, that the company shall, directly or indirectly, lend or invest in other persons or entities identified in any manner whatsoever by or on behalf of the Funding party (“Ultimate beneficiaries”) or provide any guarantee, security or the like on behalf of the Ultimate Beneficiaries;
- c) Based on such audit procedures that the auditor has considered reasonable and appropriate in the circumstances, nothing has come to their notice that has caused them to believe that the representations under sub-clause (i) and (ii) contain any material mis-statement.
- v The group has not declared or paid any dividend during the year.
- vi Based on our examination, which included test checks, the Company and its subsidiaries have used accounting software’s for maintaining its books of account for the financial year ended March 31, 2024, which has a feature of recording audit trail (edit log) facility and the same has operated throughout the year for all relevant transactions recorded in the software’s. Further, during the course of our audit we did not come across any instance of the audit trail feature being tampered with.
- vii As proviso to Rule 3(1) of the Companies (Accounts) Rules, 2014 is applicable from April 1, 2023, reporting under Rule 11(g)of the Companies (Audit and Auditors) Rules, 2014 on preservation of audit trail as per the statutory requirements for record retention is not applicable for the financial year ended March 31, 2024.
2. With respect to the matter specified in paragraph 3 (xxi) and 4 of the Companies (Auditor’s Report) order 2020(the “order”/”CARO”) issued by the Central Government in terms of Section 143(11) of the Act, to be included in the Auditors’ report, according to the information and explanation given to us and based on the CARO reports issued by us for the company and its subsidiaries included in the consolidated financial statement of the company, to which reporting under CARO is applicable, we report that there is no qualification or adverse remarks in these CARO reports. .

ANNEXURE -A' TO THE INDEPENDENT AUDITORS' REPORT

(Referred to in paragraph 1 (f) under 'Report on Other Legal and Regulatory Requirements' section of our report to the Members of Atlanta Limited of even date)

Report on the Internal Financial Controls Over Financial Reporting under Clause (i) of Sub-section 3 of Section 143 of the Companies Act, 2013 ("the Act")

In conjunction with our audit of the Consolidated Ind AS Financial Statements of the Company as of and for the year ended March 31, 2024, we have audited the internal financial controls over financial reporting of ATLANTAA LIMITED (hereinafter referred to as "Company") and its subsidiary companies, which are companies incorporated in India, as of that date.

Management's Responsibility for Internal Financial Controls

The Board of Directors of the Company and its subsidiary companies, which are companies incorporated in India, are responsible for establishing and maintaining internal financial controls based on the internal control over financial reporting criteria established by the respective Companies considering the essential components of internal control stated in the Guidance Note on Audit of Internal Financial Controls Over Financial Reporting issued by the Institute of Chartered Accountants of India ("the ICAI"). These responsibilities include the design, implementation and maintenance of adequate internal financial controls that were operating effectively for ensuring the orderly and efficient conduct of its business, including adherence to the respective company's policies, the safeguarding of its assets, the prevention and detection of frauds and errors, the accuracy and completeness of the accounting records, and the timely preparation of reliable financial information, as required under the Act.

Auditor's Responsibility

Our responsibility is to express an opinion on the internal financial controls over financial reporting of the Company and its subsidiary companies, which are companies incorporated in India, based on our audit. We conducted our audit in accordance with the Guidance Note on Audit of Internal Financial Controls Over Financial Reporting (the "Guidance Note") issued by the Institute of Chartered Accountants of India and the Standards on Auditing, prescribed under Section 143(10) of the Companies Act, 2013, to the extent applicable to an audit of internal financial controls. Those Standards and the Guidance Note require that we comply with ethical requirements and plan and perform the audit to obtain reasonable assurance about whether adequate internal financial controls over financial reporting was established and maintained and if such controls operated effectively in all material respects.

Our audit involves performing procedures to obtain audit evidence about the adequacy of the internal financial controls system over financial reporting and their operating effectiveness. Our audit of internal financial controls over financial reporting included obtaining an understanding of internal financial controls over financial reporting, assessing the risk that a material weakness exists, and testing and evaluating the design and operating effectiveness of internal control based on the assessed risk. The procedures selected depend on the auditor's judgement, including the assessment of the risks of material misstatement of the financial statements, whether due to fraud or error.

We believe that the audit evidence we have obtained is sufficient and appropriate to provide a basis for our audit opinion on the internal financial controls system over financial reporting of the Company and its subsidiary companies, which are companies incorporated in India.

Meaning of Internal Financial Controls Over Financial Reporting

A company's internal financial control over financial reporting is a process designed to provide reasonable assurance regarding the reliability of financial reporting and the preparation of financial statements for external purposes in accordance with generally accepted accounting principles.

A company's internal financial control over financial reporting includes those policies and procedures that (1) pertain to the maintenance of records that, in reasonable detail, accurately and fairly reflect the transactions and dispositions of the assets of the company; (2) provide reasonable assurance that transactions are recorded as necessary to permit preparation of financial statements in accordance with generally accepted accounting principles, and that receipts and expenditures of the company are being made only in accordance with authorisations of management and directors of the company; and (3) provide reasonable assurance regarding prevention or timely detection of unauthorised acquisition, use, or disposition of the company's assets that could have a material effect on the financial statements

Inherent Limitations of Internal Financial Controls Over Financial Reporting

of the inherent limitations of internal financial controls over financial reporting, including the possibility of collusion or improper management override of controls, material misstatements due to error or fraud may occur and not be detected. Also, projections of any evaluation of the internal financial controls over financial reporting to future periods are subject to the risk that the internal financial control over financial reporting may become inadequate because of changes in conditions, or that the degree of compliance with the policies or procedures may deteriorate.

Opinion

In our opinion and to the best of our information and according to the explanations given to us, the Company and its subsidiary companies, which are companies incorporated in India, have, in all material respects, an adequate internal financial controls system over financial reporting and such internal financial controls over financial reporting were operating effectively as at March 31, 2024, based on the internal control over financial reporting criteria established by the respective companies considering the essential components of internal control stated in the Guidance Note on Audit of Internal Financial Controls Over Financial Reporting issued by the Institute of Chartered Accountants of India.

These financial statements were authorized for issue by the Board of Directors on May 25, 2024.

2 Summary of significant accounting policies

2.1 Basis of preparation

The Consolidated financial statements have been prepared in accordance with the Indian Accounting Standards (hereinafter referred to as the 'Ind AS') as notified by Ministry of Corporate Affairs pursuant to Section 133 of the Companies Act, 2013 ('the Act') read with the Companies (Indian Accounting standards) Rules, 2015 and other relevant provisions of the Act

The principal accounting policies applied in the preparation of these financial statements are set out below. These policies have been consistently applied to all the years presented, unless otherwise stated.

i) Historical cost convention

The financial statements have been prepared under the historical cost convention, as modified by the following:

- a. Certain financial assets and financial liabilities at fair value;
- b. Defined benefit plans - plan assets that are measured at fair value;

ii) Current Vis-a-vis non-current classification

The assets and liabilities reported in the balance sheet are classified on a "current/non-current basis", with separate reporting of assets held for sale and liabilities. Current assets, which include cash and cash equivalents, are assets that are intended to be realized, sold or consumed during the normal operating cycle of the Company or in the 12 months following the balance sheet date; current liabilities are liabilities that are expected to be settled during the normal operating cycle of the Company or within the 12 months following the close of the financial year. The deferred tax assets and liabilities are classified as non-current assets and liabilities.

2.2 Basis of consolidation

The consolidated financial statements incorporate the financial statements of the Group and entities (including structured entities) controlled by the Group and its subsidiaries.

Subsidiaries

Subsidiaries are entities (including structured entities) over which the Group has control. Subsidiaries are consolidated on a line-by-line basis from the date the control is transferred to the Group. They are deconsolidated from the date that control ceases. The acquisition method of accounting is used to account for business combinations by the Group. Changes in the Group's interest in subsidiaries that do not result in a loss of control are accounted as equity transactions. The carrying amount of the Company's interests and then on-controlling interests are adjusted to reflect the changes in their relative interests in the subsidiaries. Any difference between the amount by which the non-controlling interests are adjusted and the fair value of the consideration paid or received is recognized directly in equity and attributed to owners of the Company. Intercompany transactions, balances and unrealized gains on transactions between group companies are eliminated. Unrealized losses are also eliminated unless the transaction provides evidence of an impairment of the asset transferred. These financial statements are prepared by applying uniform accounting policies in use at the Group.

Associates

Associates are the entities over which the Group has significant influence. Investment in associates are accounted for using the equity method of accounting, after initially being recognized at cost. Joint Arrangements joint venture is a joint arrangement whereby the parties have the rights to the net assets of the arrangement. The results, assets and liabilities of a joint venture are accounted using the equity method of accounting. Where the Group's activities are conducted through

Consolidation procedure:

- a. Combine like items of assets, liabilities, equity, income, expenses and cash flows of the parent with those of its subsidiaries. For this purpose, income and expenses of the subsidiary are based on the amounts of the assets and liabilities recognized in the consolidated financial statements at the acquisition date.
- b. Offset (eliminate) the carrying amount of the parent's investment in each subsidiary and the parent's portion of equity of each subsidiary. Business combinations policy explains how to account for any related goodwill.

Eliminate in full intragroup assets and liabilities, equity, income, expenses and cash flows relating to transactions between entities of the group (profits or losses resulting from intragroup transactions that are recognized in assets, such as inventory and fixed assets, are eliminated in full). Intragroup losses may indicate an impairment that requires recognition in the consolidated financial statements. Ind AS 12 Income Taxes applies to temporary differences that arise from the elimination of profits and losses resulting from intragroup transactions.

"Profit or loss and each component of Other Comprehensive Income (OCI) are attributed to the equity holders of the parent of the group and to the non-controlling interests, even if this results in the non-controlling interests having a deficit balance. When necessary, adjustments are made to the financial statements of subsidiaries to bring their accounting policies into line with the group's accounting policies. All intra-group assets and liabilities, equity, income, expenses and cash flows relating to transactions between members of the group are eliminated in full on consolidation."

2.3 Fair value measurement

(₹ in Lakhs)

Fair value is the price that would be received to sell an asset or paid to transfer a liability in an orderly transaction between market participants on the measurement date. The Company uses valuation techniques that are appropriate in the circumstances for which sufficient data are available to measure fair value, maximizing the use of relevant observable inputs and minimizing the use of unobservable inputs.

All assets and liabilities for which fair value is measured or disclosed in the financial statements are categorized within the fair value hierarchy, described as follows, based on the lowest level input that is significant to the fair value measurement as a whole:

- > Level 1- Quoted (unadjusted) market prices in active markets for identical assets or liabilities
- > Level 2 - Valuation techniques for which the lowest level input that is significant to the fair value measurement is directly or indirectly observable
- > Level 3 - Valuation techniques for which the lowest level input that is significant to the fair value measurement is unobservable

2.4 Property, plant and equipment:

Freehold land is carried at historical cost. All other items of property, plant and equipment are stated at historical cost less depreciation and impairment loss, if any. Historical cost includes expenditure that is directly attributable to the acquisition of the items.

Subsequent costs are included in the asset's carrying amount or recognized as a separate asset, as appropriate, only when it is probable that future economic benefits associated with the item will flow to the Company and the cost of the item can be measured reliably. The carrying amount of any component accounted for as a separate asset is derecognized when replaced. All other repairs and maintenance are charged to profit or loss during the reporting period in which they are incurred.

Depreciation methods, estimated useful lives and residual value:

Depreciation is calculated using the straight line method to allocate their cost, net of their residual values, over their estimated useful lives which are as follows:

Particulars	Estimated useful lives(Years)
Buildings	60
Plant and equipment's and earthmoving machinery	12
Furniture and fixtures	10
Vehicles	9
Office and equipment's	5
Temporary structures	3

Estimated useful lives, residual values and depreciation methods are reviewed annually and adjusted if appropriate, at the end of each reporting period.

2.5 Capital work in progress

Expenditure incurred on assets which are not ready for their intended use comprising direct cost, related incidental expenses and attributable borrowing cost are disclosed under Capital Work-in-Progress.

2.6 Intangible assets:

Intangible assets are stated at cost of acquisition net of recoverable taxes less accumulated amortization / depletion and impairment loss, if any. The cost comprises of purchase price, cost of construction, borrowing costs and any cost directly attributable to bringing the asset to its working condition for the intended use.

2.7 Amortization method and periods

Amortization is charged on a straight-line basis over the estimated useful lives. The estimated useful lives, residual value and amortization method are reviewed at the end of each annual reporting period, with the effect of any changes in the estimate being accounted for on a prospective basis.

Amortization of intangible assets (toll roads) created under BOT projects; the revenue based methodology is adopted

Computer software is amortized over an estimated useful life of 3 years.

2.8 Lease

Ind AS 116 requires lessees to determine the lease term as the non-cancellable period of a lease adjusted with any option to extend or terminate the lease, if the use of such option is reasonably certain. The company make an assessment on the expected lease term on lease-by-lease basis and thereby assess whether it is reasonably certain that any options to extend or terminate the contract will be exercised in. In evaluating the lease term, the company consider factors such as any significant leasehold improvement undertaken over the lease term, cost relating to termination of recognized in the statement of profit and loss when incurred . The cost and related accumulated depreciation are eliminated from the financial statement upon sale or retirement of the asset and the resultant gains or losses are recognized in the Statement of Profit and Loss

2.14 Inventories

(₹ in Lakhs)

Inventories are valued as follows:

Construction materials, components, stores, spares and tools:

Lower of cost and net realizable value and includes all applicable costs in bringing goods to their present location and condition.

Work-in-progress and finished goods

Lower of cost and net realizable value. Cost includes cost of direct materials and labour and a proportion of manufacturing overheads based on the normal operating capacity, but excluding borrowing costs. Cost is determined on weighted average basis

Net realizable value is the estimated contract price in the ordinary course of business, less estimated costs of completion and estimated costs necessary to complete the contract.

Land:

Land of real estate business are valued at lower of cost and net realizable value.

Cost includes land, cost of acquisition, legal cost and all other cost to transfer the legal and beneficial ownership of land in the name of the Group.

Net realizable value is the estimated selling price in the ordinary course of business, less estimated costs of completion and the estimated costs necessary to make the sale.

2.15 Financial instruments:

A financial instrument is any contract that gives rise to a financial asset of one entity and a financial liability or equity instruments of another entity.

A. Investments and other financial assets

i. Classification

The Company classifies its financial assets in the following measurement categories:

those to be measured subsequently at fair value (either through Other Comprehensive Income or through profit or loss) and those measured at amortized cost.

The classification depends on the entity's business model for managing the financial assets and the contractual terms of the cash flows.

For assets measured at fair value, gains and losses will either be recorded in profit or loss or Other Comprehensive Income. For investments in debt instruments, this will depend on the business model in which the investment is held. For investments in equity instruments in subsidiaries, the Company has made an irrevocable election at the time of initial recognition to account for the equity investment at fair value through Other Comprehensive Income.

The Company reclassifies debt investments when and only when its business model for managing those assets changes.

ii. Measurement

At initial recognition, the Company measures financial assets at its fair value plus, in the case of financial assets not at fair value through profit or loss, transaction costs that are directly attributable to the acquisition of the financial assets. Transaction costs of financial assets carried at fair value through profit or loss are expensed in profit or loss.

Debt instruments

Subsequent measurement of debt instruments depends on the Company's business model for managing the asset and the cash flow characteristics of the asset. There are three measurement categories into which the Company classifies its debt instruments:

Amortized cost:

Assets that are held for collection of contractual cash flows where those cash flows represent solely payments of principal and interest are measured at amortized cost. A gain or loss on a debt investment that is subsequently measured at amortized cost is recognized in profit or loss when the asset is derecognized or impaired. Interest income from these financial assets is included in other income using the effective interest rate method.

Fair value through Other Comprehensive Income (FVOCI):

Assets that are held for collection of contractual cash flows and for selling the financial assets, where the assets' cash flows represent solely payments of principal and interest, are measured at FVOCI. Movements in the carrying amount are taken through OCI, except for the recognition of impairment gains or losses, interest revenue and foreign exchange gains and losses which are recognized in profit and loss. When the financial asset is derecognized, the cumulative gain or loss previously recognized in OCI is reclassified from equity to profit or loss and recognized in other gains/ (losses). Interest income from these financial assets is included in other income using the effective interest rate method.

Fair Value through Profit or Loss (FVTPL):

Assets that do not meet the criteria for amortized cost or FVOCI are measured at FVTPL. A gain or loss on a debt investment that is subsequently measured at fair value through profit or loss is recognized in profit or loss in the period in which it arises. Interest income from these financial assets is included in other income.

Impairment of financial assets:

The Company assesses on a forward looking basis the expected credit losses associated with its assets carried at amortized cost. The impairment methodology applied depends on whether there has been a significant increase in credit risk.

For trade receivables only, the Company applies the simplified approach permitted by Ind AS 109-'Financial Instruments', which requires expected lifetime losses to be recognized from initial recognition of the receivables.

Derecognition of financial assets

(₹ in Lakhs)

A financial asset is derecognized only when:

- a. The Company has transferred the rights to receive cash flows from the financial asset or
- b. retains the contractual rights to receive the cash flows of the financial asset, but assumes a contractual obligation to pay the cash flows to one or more recipients.

Where the entity has transferred an asset, the Company evaluates whether it has transferred substantially all risks and rewards of ownership of the financial asset. In such cases, the financial asset is derecognized. Where the entity has not transferred substantially all risks and rewards of ownership of the financial asset, the financial asset is not derecognized. Where the entity has neither transferred a financial asset nor retains substantially all risks and rewards of ownership of the financial asset, the financial asset is derecognized if the Company has not retained control of the financial asset. Where the group retains control of the financial asset, the asset is continued to be recognized to the extent of continuing involvement in the financial asset.

Income recognition:

Interest income

Interest income from debt instruments is recognized using the effective interest rate method. The effective interest rate is the rate that exactly discounts estimated future cash receipts through the expected life of the financial asset to the gross carrying amount of a financial asset. When calculating the effective interest rate, the Company estimates the expected cash flows by considering all the contractual terms of the financial instrument (for example prepayment, extension, call and similar options) but does not consider the expected credit losses.

Dividend

Dividends are recognized in profit or loss only when the right to receive payment is established, it is probable that the economic benefits associated with the dividend will flow to the Company, and the amount of the dividend can be measured reliably.

Contributed equity:

Equity shares are classified as equity. Incremental costs directly attributable to the issue of new shares or options are shown in equity as a deduction, net of tax from the proceeds.

B. Financial liabilities:

i. Classification as debt or equity

Debt and equity instruments issued by the Company are classified as either financial liabilities or as equity in accordance with the substance of the contractual arrangements and the definition of a financial liability and an equity instrument.

An equity instrument is any contract that evidences a residual interest in the assets of an entity after deducting all of its liabilities.

ii. Initial recognition and measurement:

All financial liabilities are recognized initially at fair value and, in the case of loans and borrowings and payables, net of directly attributable transaction costs.

The Company's financial liabilities include trade and other payables, loans and borrowings including bank overdrafts and financial guarantee contracts.

iii. Subsequent measurement:

The measurement of financial liabilities depends on their classification, as described below:

Borrowings:

Borrowings are subsequently carried at amortized cost; any difference between the proceeds (net of transaction costs) and the redemption value is recognized in the Statement of Profit and Loss over the period of the borrowings using the effective interest rate method.

Fees paid on the establishment of loan facilities are recognized as transaction costs of the loan to the extent that it is probable that some or all of the facility will be drawn down. In this case, the fee is deferred until the drawdown occurs. To the extent there is no evidence that it is probable that some or all of the facility will be drawn down, the fee is capitalized as a pre-payment for liquidity services and amortized over the period of the facility to which it relates.

Trade and other payables:

These amounts represent obligations to pay for goods or services that have been acquired in the ordinary course of business from suppliers. Those payable are classified as current liabilities if payment is due within one year or less otherwise they are presented as non-current liabilities. Trade and other payables are subsequently measured at amortized cost using the effective interest rate method.

Financial guarantee contracts:

Financial guarantee contracts are recognized as a financial liability at the time when guarantee is issued. The liability is initially at fair value and subsequently at the higher of the amount determined in accordance with Ind AS 37 and the amount initially recognized less cumulative amortization, where appropriate.

Where guarantees in relation to loans of subsidiaries are provided for no compensation, the fair values as on the date of transition are accounted for as contribution and recognized as part of the cost of the equity investment.

iv. Derecognition:

Borrowings are removed from the Balance Sheet when the obligation specified in the contract is discharged, cancelled or expired. The difference between the carrying amount of a financial liability that has been extinguished or transferred to another party and the consideration paid, including any non-cash assets transferred or liabilities assumed, is recognized in profit or loss as other gains (losses). When an existing financial liability is replaced by another from the same lender on substantially different terms, or the terms of an existing liability are substantially modified, such an exchange or modification is treated as the derecognition of the original liability and the recognition of a new liability. The difference in the respective carrying amounts is recognized in the Statement of Profit and Loss.

2.16 Borrowing costs:

(₹ in Lakhs)

General and specific borrowing costs that are directly attributable to the acquisition, construction or production of a qualifying asset are capitalized during the period of time that is required to complete and prepare the asset for its intended use or sale. Qualifying assets are assets that necessarily take a substantial period of time to get ready for their intended use or sale. Investment income earned on the temporary investment of specific borrowings pending their expenditure on qualifying assets is deducted from the borrowing costs eligible for capitalization. Other borrowing costs are expensed in the period in which they are incurred.

2.17 Provisions, Contingent Liabilities and Contingent Assets:

i. Provisions

Provisions are recognized when the Company has a present legal or constructive obligation as a result of past events; it is probable that an outflow of resources will be required to settle the obligation; and the amount has been reliably estimated.

Provisions are measured at the present value of management's best estimate of the expenditure required to settle the present obligation at the end of the reporting period. The discount rate used to determine the present value is a pre-tax rate that reflects current market assessments of the time value of money and the risks specific to the liability. The increase in the provision due to the passage of time is recognized as interest expense.

ii. Contingent Liabilities

Contingent liabilities are disclosed when there is a possible obligation arising from past events, the existence of which will be confirmed only by the occurrence or non-occurrence of one or more uncertain future events not wholly within the control of the Company. A present obligation that arises from past events where it is either not probable that an outflow of resources will be required to settle or reliable estimate of the amount cannot be made, is termed as contingent liability.

iii. Contingent Assets

A contingent asset is disclosed, where an inflow of economic benefits is probable.

2.18 Revenue recognition:

Revenue is measured at the fair value of the consideration received or receivable, and represents amount receivable for goods supplied, stated net of discounts, returns, value added taxes and Goods and service tax (GST).

i. Revenue from Toll operations

Income from toll contracts on Build Operate and Transfer (BOT) basis are recognized on actual collection of toll revenue as per the Concession agreement.

Additional claim including escalations, which in the opinion of the management, are recoverable on the contract are recognized at the time of evaluating the job.

Revenue from toll collection is recognized on the receipt of toll from users of the concession facility.

ii. Revenue from construction contracts

Ind AS 115 establishes a five-step model to account for revenue arising from contracts with customers. Under Ind AS 115, revenue is recognized at an amount that reflects the consideration to which an entity expects to be entitled in exchange for transferring goods or services to a customer.

This standard requires revenue to be recognized when promised goods or services are transferred to customers in amounts that reflect the consideration to which the company expects to be entitled in exchange for those goods or services.

When the outcome of a construction contract can be estimated reliably and it is probable that the contract will be profitable, contract revenue is recognized over the period of the contract by reference to the stage of completion. Contract revenue is measured at the fair value of the consideration received or receivable.

For the purpose of recognizing revenue, contract revenue comprises the initial amount of revenue agreed in the contract, the variations in contract work, claims and incentive payments to the extent that its receipt is considered probable and the amounts are capable of being reliably measured. Contract cost are recognized as expenses by reference to the stage of completion of the contract activity at the end of the reporting period. When it is probable that total contract costs will exceed the total contract revenue, the expected loss is recognized as an expense immediately.

When the outcome of a construction contract cannot be estimated reliably, contract revenue is recognized only to the extent of contract costs incurred that are likely to be recoverable.

Claims and amount in respect thereof are recognized only when the negotiations have advanced to a stage where it is probable that the customers will accept them and amount can be reliably measured. In the case of Arbitration awards and disputed claims pertaining to construction contracts revenue is recognized when the claims are granted in favor of the Company and where it is reasonable to expect the ultimate collection of such arbitration awards / disputed claims pertaining to construction contracts.

The Company evaluates whether it is acting as a principal or agent by considering a number of factors which includes inventory risk, customer's credit risk for the amount receivable from the customer, primary responsibility for providing goods and services to the consumer. Where the Company is acting as an principal in the transaction, revenue and related costs are recorded at their gross values. Where the Company is effectively acting as an agent in the transaction, revenue and related costs are recorded at their net values.

iii. Revenue recognition on account of arbitration/litigation claims

The Company has exercised judgment over recognition of revenue arising on account of claims made by the Company to the customer on account of several breaches committed by the customer during the period of contract, dispute over quantity and rates of materials used in execution of the project leading to dispute which has been settled vide arbitration process and the outcome of these awards including the timing and the amount of revenue recognition requires a reasonable degree of estimation.

2.19 Income and recognition:

(₹ in Lakhs)

i. Interest income

Interest income from debt instruments is recognized using the effective interest rate method. The effective interest rate is the rate that exactly discounts estimated future cash receipts through the expected life of the financial asset to the gross carrying amount of a financial asset. When calculating the effective interest rate, the Company estimates the expected cash flows by considering all the contractual terms of the financial instrument (for example prepayment, extension, call and similar options) but does not consider the expected credit losses.

ii. Rental income

Rental income arising from operating lease on investment properties is accounted for on a straight line basis over lease terms unless the receipts are structured to increase in line with expected general inflation to compensate for the expected inflationary cost increases and is included in the Statement of profit or loss due to its operating nature.

iii. Dividend

Dividends are recognized in profit or loss only when the right to receive payment is established, it is probable that the economic benefits associated with the dividend will flow to the Company, and the amount of the dividend can be measured reliably.

2.20 Retirement and other employee benefits:

i. Short-term obligations

Liabilities for wages and salaries, including non-monetary benefits that are expected to be settled wholly within 12 months after the end of the period in which the employees render the related service are recognized in respect of employees' services up to the end of the reporting period and are measured at the amounts expected to be paid when the liabilities are settled. The liabilities are presented as current employee benefit obligations in the balance sheet.

ii. Other long-term employee benefit obligations

The liabilities for earned leave and sick leave are not expected to be settled wholly within 12 months after the end of the period in which the employees render the related service. They are therefore measured as the present value of expected future payments to be made in respect of services provided by employees up to the end of the reporting period using the projected unit credit method. The benefits are discounted using the market yields at the end of the reporting period that have terms approximating to the terms of the related obligation. Re-measurements as a result of experience adjustments and changes in actuarial assumptions are recognized in Statement of Profit or Loss.

The obligations are presented as current liabilities in the balance sheet if the entity does not have an unconditional right to defer settlement for at least twelve months after the reporting period, regardless of when the actual settlement is expected to occur.

iii. Post-employment obligations

a. Gratuity obligations

The liability or asset recognized in the balance sheet in respect of defined benefit gratuity plans is the present value of the defined benefit obligation at the end of the reporting period less the fair value of plan assets. The defined benefit obligation is calculated annually by actuaries using the projected unit credit method.

The present value of the defined benefit obligation denominated in Rupees is determined by discounting the estimated future cash outflows by reference to market yields at the end of the reporting period on government bonds that have terms approximating to the terms of the related obligation.

The net interest cost is calculated by applying the discount rate to the net balance of the defined benefit obligation and the fair value of plan assets. This cost is included in employee benefit expense in the Statement of Profit and Loss.

Re-measurement gains and losses arising from experience adjustments and changes in actuarial assumptions are recognized in the period in which they occur, directly in Other Comprehensive Income. They are included in Retained Earnings in the Statement of Changes in Equity and in the Balance Sheet.

Changes in the present value of the defined benefit obligation resulting from plan amendments or curtailments are recognized immediately in profit or loss as past service cost.

b. Defined contribution plans

Provident fund

The Company pays provident fund contributions to publicly administered provident funds as per local regulations. The Company has no further payment obligations once the contributions have been paid. The contributions are accounted for as defined contribution plans and the contributions are recognized as employee benefit expense when they are due. Prepaid contributions are recognized as an asset to the extent that a cash refund or a reduction in the future payments is available.

2.21 Income tax:

(₹ in Lakhs)

The income tax expense or credit for the period is the tax payable on the current period's taxable income based on the applicable income tax rate for each jurisdiction adjusted by changes in deferred tax assets and liabilities attributable to temporary differences and to unused tax losses.

The current income tax charge is calculated on the basis of the tax laws enacted or substantively enacted at the end of the reporting period. Management periodically evaluates positions taken in tax returns with respect to situations in which applicable tax regulation is subject to interpretation. It establishes provisions where appropriate on the basis of amounts expected to be paid to the tax authorities.

Deferred income tax is provided in full, on temporary differences arising between the tax base of assets and liabilities and their carrying amounts in the financial statements. Deferred income tax is also not accounted for if it arises from initial recognition of an asset or liability in a transaction other than a business combination that at the time of the transaction affects neither accounting profit nor taxable profit (tax loss). Deferred income tax is determined using tax rates (and laws) that have been enacted or substantially enacted by the end of the reporting period and are expected to apply when the related deferred income tax asset is realized or the deferred income tax liability is settled.

Deferred tax assets are recognized for all deductible temporary differences and unused tax losses only if it is probable that future taxable amounts will be available to utilize those temporary differences and losses. Deferred tax assets and liabilities are offset when there is a legally enforceable right to offset current tax assets and liabilities. Current tax assets and tax liabilities are offset where the entity has a legally enforceable right to offset and intends either to settle on a net basis or to realize the asset and settle the liability simultaneously.

Current and deferred tax is recognized in profit or loss, except to the extent that it relates to items recognized in Other Comprehensive Income or directly in equity. In this case, the tax is also recognized in Other Comprehensive Income or directly in equity, respectively.

2.22 Earnings per share:

Basic earnings per share

Basic earnings per share is calculated by dividing:

- the profit attributable to equity shareholder of the Company
- by the weighted average number of equity shares outstanding during the financial year.

Diluted earnings per share

Diluted earnings per share adjust the figures used in the determination of basic earnings per share to take into account:

- the after income tax effect of interest and other financing costs associated with dilutive potential equity shares, and
- the weighted average number of additional equity shares that would have been outstanding assuming the conversion of all dilutive potential equity shares.

2.23 Cash flow statement:

Cash flows are reported using the indirect method, whereby profit before tax is adjusted for the effects of transactions of non-cash nature and any deferrals or accruals of past or future cash receipts or payments. The cash flows from operating, investing and financing activities of the Company are segregated based on the available information.

2.24 Segment reporting:

Operating segments are reported in a manner consistent with the internal reporting provided to the Chief Operating Decision-Maker. The chief operating decision-maker, who is responsible for allocating resources and assessing performance of the operating segments, has been identified as the Managing Director and the Chief Financial Officer that makes strategic decisions.

2.25 Business combinations:

Business combinations involving entities that are controlled by the Company are accounted for using the pooling of interests method as follows:

- i. The assets and liabilities of the combining entities are reflected at their carrying amounts.
- ii. No adjustments are made to reflect fair values, or recognize any new assets or liabilities.
- iii. Adjustments are only made to harmonies accounting policies.
- iv. The financial information in the financial statements in respect of prior periods is restated as if the business combination had occurred from the beginning of the preceding period in the financial statements, irrespective of the actual date of the combination. However, where the business combination had occurred after that date, the prior period information is restated only from that date.
- v. The balance of the retained earnings appearing in the financial statements of the transferor is aggregated with the corresponding balance appearing in the financial statements of the transferee or is adjusted against General Reserve.

The identities of the reserves are preserved and the reserves of the transferor become the reserves of the transferee.

- vi. The difference, if any, between the amounts recorded as share capital issued plus any additional consideration in the form of cash or other assets and the amount of share capital of the transferor is transferred to capital reserve and is presented separately from other capital reserves.

2.26 Critical accounting estimates and judgments:

The preparation of the financial statements under Ind AS requires management to take decisions and make estimates and assumptions that may impact the value of revenues, costs, assets and liabilities and the related disclosures concerning the items involved as well as contingent assets and liabilities at the balance sheet date. Estimates and judgments are continually evaluated and are based on historical experience and other factors, including expectations of future events that are believed to be reasonable under the circumstances.

The Company makes estimates and assumptions concerning the future. The resulting accounting estimates will, by definition, seldom equal the related actual results. The estimates and assumptions that have a significant risk of causing a material adjustment to the carrying amounts of assets and liabilities within the next financial year.

2.27 Classifications of Joint Arrangement as Jointly Controlled Operations

The Company based on rights and obligations that arises from the contractual arrangement entered into between the parties has classified certain Joint Arrangements entered into by the Company with parties to execute the construction contracts as Jointly Controlled Operations where the contractual agreement provides rights to assets and obligations for liabilities for those parties sharing joint control and the legal form does not confer separation between the investors and the special purpose vehicle i.e. partnership firms formed under the Indian Partnership Act, 1932 to execute the project.

2.28 Expected Credit Loss

(₹ in Lakhs)

Company has a policy of regularly reviewing the recoverability of trade receivables. Substantial amount of trade receivables of the Company represents amount recoverable from the customers arising on account of arbitration claims pending against the Company. The expected credit loss allowance for trade receivables is made as per provision policy of the Company which takes into account the historical credit loss experience and adjusted for forward looking information.

3.3(a) The Concession Agreement with Bihar State Road Development Corporation (Authority) was terminated by the MORA Tollways Limited (Subsidiary) on 20.02.2015 for Authority Defaults and the Subsidiary had claimed termination payment amounting to ₹61,052.73 Lakhs plus interest. The Subsidiary filed Writ Petition No.7259 of 2015 for payment and the Honorable High Court of Patna by Order dated 22.09.2015 has held termination by the Subsidiary as valid and legal directed the Authority to pay termination payment of ₹61,052.73 Lakhs plus interest. The appeals are finally disposed by the Supreme Court of India directing adjudication of termination payment by the Arbitral Tribunal. The Arbitral Tribunal vide Award dated 21.05.2019 rejected the Subsidiary's claim for termination payment amounting to ₹61,052.73 Lakhs plus interest and awarded NIL amount against the said claim. The said Award is challenged by Subsidiary under Section 34 of the Arbitration and Conciliation Act, 1996 before the Hon'ble District Court, Patna. The said Company petition was dismissed by Hon'ble District Court, Patna. The Company not satisfied by the decision of Hon'ble District Court, and has challenged the same before the Hon'ble High Court of Patna. Thus the matter is subjudice.

3.3(b) The Concession Agreement notified by Punjab Infrastructure Development Board (PIDB) is permitting collection of Toll up to 14th October, 2029. The Authority has terminated the Concession Agreement vide letter no.PWD-BR-3012/21/2021-3BR3/178/1 dated.05-08-2021. By virtue of termination of Concession agreement, the BOT (Intangible Asset) and toll collection right have been taken over by PIDB. In view of this, the Company loses the BOT (Intangible Asset) usable right, hence the BOT assets has been written-off in the books of Atlanta Ropar Tollways Pvt.Ltd (Subsidiary) and charged to profit and loss account by the subsidiary under "Exceptional Items" in the financial year 2021-22.

The said SPV has completed the said project and received Commercial Operation Certificate from the competent Authority on 08-11-2016 and collection of toll from the users of the facility is in progress

The Authority (PIDB) has terminated the Concession Agreement vide letter no.PWD-BR-3012/21/2021-3BR3/178/1 dated.05-08-2021, and has taken over the BOT Intangible assets and toll collection right from the Company. In terms of Article 31 of the Concession Agreement, by virtue of termination of Concession Agreement, the BOT (Intangible Asset) and toll collection right have been takeover by PIDB. Hence there is no toll income in the year under review.

7 Employee benefit obligations

The Company has classified various employee benefits as under:

a. Defined contribution plans

i. Provident fund

ii. Employees’ Pension Scheme, 1995

The provident fund and the state defined contribution plan are operated by the regional provident fund commissioner. Under the schemes, the Company is required to contribute a specified percentage of payroll cost to the retirement benefit schemes to fund the benefits.

The Company has recognized the following amounts in the Statement of Profit and Loss for the year:

Particulars	31-Mar-24	31-Mar-23
Contribution to provident fund	1.36	1.53

c. Post employment obligation

Gratuity

(₹ in Lakhs)

The Company has a defined benefit plan, governed by the Payment of Gratuity Act, 1972. The plan entitles an employee, who has rendered at least five years of continuous service, to gratuity at the rate of fifteen days basic salary for every completed years of services or part thereof in excess of six months, based on the rate of basic salary last drawn by the employee concerned.

i. Significant estimates: actuarial assumptions

Valuations in respect of gratuity have been carried out by an independent actuary, as at the Balance Sheet date,

Based on the following assumptions:

Particulars	31-Mar-24	31-Mar-23
Discount rate (per annum)	7.10%	7.30%
Rate of increase in compensation levels	5.00%	5.00%
Expected average remaining working lives of employees in number of years	15.00% p.a at all ages	15.00% p.a at all ages

The estimate of rate of escalation in salary considered in actuarial valuation, takes into account inflation, seniority, promotion and other relevant factors including supply and demand in the employment market.

The above sensitivity analyses are based on a change in an assumption while holding all other assumptions constant. In practice, this is unlikely to occur, and changes in some of the assumptions may be correlated. While calculating the sensitivity of the defined benefit obligation to significant actuarial assumptions the same method (present value of the defined benefit obligation calculated with the projected unit credit method at the end of the reporting period) has been applied as when calculating the defined benefit liability recognized in the balance sheet. The methods and types of assumptions used in preparing the sensitivity analysis did not change compared to the prior period.

12 Fair value measurements

The carrying amounts of trade receivables, cash and cash equivalents, bank balance other than cash and cash equivalents, other financial assets, trade payables, capital creditors are considered to be same as their fair values, due to their Short-term nature.

The carrying value of borrowings, deposits given and taken and other financial assets and liabilities are considered to be reasonably same as their fair values. These are classified as level 3 fair values in the fair value hierarchy due to the inclusion of unobservable inputs including counterparty credit risk

c. Fair value hierarchy

This section explains the judgment's and estimates made in determining the fair values of the financial instruments that are (a) recognized and measured at fair value and (b) measured at amortized cost and for which fair values are disclosed in the financial statements. To provide an indication about the reliability of the inputs used in determining fair value, the company has classified its financial instruments into the three levels prescribed under the accounting standard. An explanation of each level follows underneath the table.

d) Valuation processes

The Company obtains assistance of independent and competent third party valuation experts to perform the valuations of financial assets and liabilities required for financial reporting purposes, including level 3 fair values. Discussions of valuation processes and results are held between the Company and the value on periodically basis.

e) Valuation technique used to determine fair values

The main level 3 inputs used by the Company are derived and evaluated as follows:

The fair value of financial instruments is determined using discounted cash flow analysis.

The carrying amount of current financial assets and liabilities are considered to be the same as their fair values, due to their short term nature.

The fair value of the long-term Borrowings with floating-rate of interest is not impacted due to interest rate changes, and will not be significantly different from their carrying amounts as there is no significant change in the under-lying credit risk of the Company borrowing (since the date of inception of the loans). Further, the Company has no long-term Borrowings with fixed rate of interest.

For financial assets and liabilities that are measures at fair value, the carrying amount is equal to the fair values.

Note:

Level 1: Level 1 hierarchy includes financial instruments measured using quoted prices.

Level 2: The fair value of financial instruments that are not traded in an active market (for example over-the-counter derivatives) is determined using valuation techniques which maximize the use of observable market data and rely as little as possible on entity-specific estimates. If all significant inputs required to fair value an instrument are observable, the instrument is included in level 2.

Level 3: If one or more of the significant inputs is not based on observable market data, the instrument is included in level 3. This is the case for unlisted equity securities which are included in level 3.

There are no transfers between any levels during the year.

The Company's policy is to recognize transfer into and transfer out of fair value hierarchy levels as at the end of the reporting period.

13 Financial risk management

The Company's business activities expose it to a variety of financial risks, namely liquidity risk, market risks and credit risk.

Risk	Exposure arising from	Measurement	Management
Credit Risk	Cash and cash equivalents, trade receivables, financial assets measured at amortized cost.	Aging analysis	Diversification of bank deposits, letters of credit
Liquidity Risk	Borrowings and other liabilities	Rolling cash flow forecasts	Availability of committed credit lines and borrowing facilities
Market risk-interest rate	Long-term borrowings at variable rates	Sensitivity analysis	Unhedged

a. Credit risk

The Company is exposed to credit risk, which is the risk that counterparty will default on its contractual obligation resulting in a financial loss to the Company

Credit risk arises from cash and cash equivalents, financial assets carried at amortized cost and deposits with banks and financial institutions, as well as credit exposures to trade customers including outstanding receivables.

Credit risk management

Credit risk is the risk that a counterparty will not meet its obligations under a financial instrument or customer contract, leading to a financial loss.

The Company's credit risk arises from accounts receivable balances. Major customers of the Companies include public sector enterprises and state owned companies having high credit quality. Accordingly, the Company's customer credit risk is very low. With respect to intercorporate deposits/loans given to subsidiaries, the Company will be able to control the cash flows of those subsidiaries as the subsidiaries are wholly owned by the Company.

For banks and financial institutions, only highly rated banks/institutions are accepted. Generally all policies surrounding credit risk have been managed at company level.

The Company is making provision for trade receivables based on Expected Credit Loss (ECL) model. The reconciliation of ECL is as below:

Particulars	31-Mar-24	31-Mar-23
Opening balance	-	-
Bad-debts	-	-
Closing balance	-	-

Atlanta Limited (formerly known as Atlanta Limited)
Notes to the Consolidated financial statements as of and for the year ended March 31, 2024

b. Liquidity risk

(₹ in Lakhs)

Prudent liquidity risk management implies maintaining sufficient cash and marketable securities and the availability of funding through an adequate amount of committed credit facilities to meet obligations when due and to close out market positions. Due to the dynamic nature of the underlying businesses, company treasury maintains flexibility in funding by maintaining availability under committed credit lines.

Management monitors rolling forecasts of the Company's liquidity position and cash and cash equivalents on the basis of expected cash flows. This is generally carried out at local level in the operating subsidiaries of the Company in accordance with practice and limits set by the Company. These limits vary by location to take into account the liquidity of the market in which the entity operates. In addition, the Company's liquidity management policy involves projecting cash flows in major currencies and considering the level of liquid assets necessary to meet these monitoring balance sheet liquidity ratios against internal and external regulatory requirements and maintaining debt financing plans.

i Maturities of financial liabilities

The amounts disclosed below are the contractual undiscounted cash flows. Balances due within 12 months equal their carrying balances as the impact of discounting is not significant

Total financial liabilities	<u>82,895.47</u>	<u>1,902.67</u>	-	<u>84,798.14</u>

* Includes contractual interest payments based on the interest rate prevailing at the reporting date.

c. Market risk

Market risk is the risk that the fair values of future cash flows of a financial instrument will fluctuate because of volatility of prices in the financial markets. Market risk can be further segregated as: a) Foreign currency risk and b) Interest rate risk.

i. Foreign currency risk

Foreign currency risk is the risk that the fair value or future cash flows of a financial instrument will fluctuate because of changes in foreign exchange rates. Company does not have any foreign currency loans, receivables or payables, hence the risk towards foreign currency risk is not applicable to the Company.

For that reason, sensitivity analysis with respect to foreign currency risk has not been disclosed

ii. Interest rate risk

Interest rate risk is the risk that the fair value or future cash flows of a financial instrument will fluctuate because of changes in market interest rates. The Company's main interest rate risk arises from long-term borrowings with variable rates, which expose the Company to cash flow interest rate risk.

The Company's fixed rate borrowings are carried at amortized cost. They are therefore not subject to interest rate risk as defined in Ind AS-107, since neither the carrying amount nor the future cash flows will fluctuate because of a change in market interest rates.
